

We work with:

Logistics Companies
Trucking Companies
Airline Freight Services
Rail Freight Services
Moving Companies
Delivery Services
(and others)

goVertical.[®] transportation

Transportation/Logistics

Fluctuating fuel costs are always a factor. We understand companies in transportation are also facing increased fatigue from driver shortages, tightening federal efficiency regulations and higher operational and wage costs. Datamax's technology portfolio addresses such challenges by lowering costs, automating processes, and improving communication between drivers, carriers, and expectant consumers. ***Count on Datamax to maximize the technology that matters!***

Datamax can help you:

- eliminate time-consuming data entry processes through easy-to-use enhanced document and imaging workflow solutions,
- scan and capture all inbound shipping documents and easily share with internal employees as well as external entities like customers and customs agencies,
- quickly route bills of lading, proof of deliveries, invoices, air waybills, air cargo manifests, freight bills, to SharePoint, Google Mail, Outlook or other shared repositories directly from MFP control panels,
- improve supply chain decision-making and support with complete access to distribution-related documents – all accessible in real-time, and
- deploy enhanced network security to prevent unintended access or loss of information from customer files and transportation database systems.

Through relevant technology advisory and total solution deployment, we help transportation - logistics providers "go vertical" by maximizing their workflow processes, communications, and budget utilization.

Advantages You'll Realize.

Workflow/Forms Management

Optimize operational productivity with customized and integrated workflows that combine multiple tasks into single processes. For maximum efficiency, transportation-based documents can be routed to any destination based on pre-defined rules.

Regulatory Compliance

Simplify compliance with the Department of Transportation, OSHA, FMCSA and other federal, state and local statutes. Quickly access and submit documents to ensure successful audits and to avoid penalties.

Application Integration

Accelerate business operations by integrating document capture, storage and management processes with most ERP and CRM applications.

Personnel Management

Improve the recruiting and speed of onboarding drivers and operations personnel by providing better workflows for employment screening as well as the distribution of recruiting collateral and training documentation.

Cost Reduction

Reduce transportation-based operating expense through automated document distribution capabilities when sending forms for review, approval, reconciliation and retention.

Services We Offer.

Technology Consulting

Align important transportation/logistics-related goals with technology through **Datamax Xpert™** consulting. We can help you assess and improve how your current document and information technologies are supporting your core operational requirements.

Network Management

Leverage comprehensive network services featuring **TechCare®** Managed IT Services, Cloud Services, Information Security Services, and **TechCare® University** User Training for IT specific initiatives—all supported by 24/7 **TechView®** remote help desk support.

Print Management

Optimize your print output through best-in-class print technology and the industry's most responsive approach to managed print services—**PrintCare™**. All supported 24/7 by **PrintView™**—remote access for printing and connectivity.
