

Company: BlueVoyant

Founded: Co-Founded in 2017 by Fortune 500 Executives and Former Government Intelligence Directors

Market: Threat Intelligence Services | Managed Security Services | Professional Services

Number of Employees: 200+ employees

COMPANY OVERVIEW

A first-things-first cybersecurity company focused on delivering best-of-breed technology and outstanding customer service to businesses around the world. We believe in the democratization of cybersecurity - offering robust solutions and tools to businesses previously ignored and underserved. Through our advanced Threat Intelligence, Managed Security Services, and Incident Response services, we excel in intelligence gathering, cybersecurity defense, and detection of attacks with response coupled with remediation. With global SOCs, we are prepared to protect the world over from well-financed threat actors and their newest tools of attack.

SERVICES

BlueVoyant utilizes technology and expertise employed by the largest and most well-defended organizations to deliver protection to resource-constrained security teams. We believe in democratizing security by making best-in-class services and technology accessible to organizations regardless of size.

- **THREAT INTELLIGENCE SERVICES:** BlueVoyant Threat Intelligence Services monitor your company's external attack surface, assess emerging risks and deliver near real-time, actionable intelligence that is specific to your organization. Our superior Threat Intelligence can reduce the risk of attack from malicious IP addresses and domain names with advanced warning of cyber attacks in formation - even attacks external to your perimeter. Our analysts profile network vulnerabilities from an attacker's perspective.
- **MANAGED SECURITY SERVICES:** BlueVoyant protects businesses of all sizes against agile and well-financed cyber attackers. Moving beyond traditional MSSPs, we provide real-time monitoring, vulnerability detection and response, backed by our 24/7 global security operations centers. Our customers stay abreast of developing and established threat actors because our team of analysts and cybersecurity experts have the knowledge and resources to provide robust, relevant and right-sized solutions.

MANAGED DETECTION & RESPONSE (MDR+)

MDR+ detects, blocks, and contains malware, ransomware, zero-days, non-malware and file-less attacks automatically. Remote endpoint incident investigation and remediation is led by BlueVoyant cyber intelligence experts.

DETECTION-AS-A-SERVICESM

Collects logs from applications and on-premise and/or cloud infrastructure to enable advanced threat detection. We leverage proprietary, open-source, and dark web intelligence to expedite triage and enrich investigations conducted by the SOC.

MANAGED SIEM

Managed SIEM with Splunk® Enterprise correlates and analyzes network logs in real time, aggregating disparate data and applies the latest threat intelligence to filter background noise and identify real security concerns.

- **PROFESSIONAL SERVICES:** With our Proactive Services, your company can mitigate the risks associated with cybersecurity threats through the assessment, validation and improvement of your organization's cybersecurity controls. Our approach and methodologies are driven by our knowledge of advanced adversaries paired with our expertise in responding to cybersecurity incidents.

INVESTORS

BlueVoyant successfully raised \$125M to fund strategic growth, including research and development.

TECHNOLOGY PARTNERS

We are proud of our best-of-breed technology partners who help us provide leading cybersecurity services from field-seasoned experts through the BlueVoyant Technology Platform. Our partners include Carbon Black, CrowdStrike, Illusive, IronNet Cybersecurity, and Splunk®.

STRATEGIC PARTNER

CyberProtectSM from Fiserv: BlueVoyant has partnered with Fiserv to protect financial institutions from increasingly targeted cyberattacks and fast-moving threats from agile and well-funded adversaries. Fiserv, a global leader in financial services technology solutions, helps clients worldwide create and deliver experiences for a digital world. Fiserv solutions enable consumers to move and manage money with ease, speed and convenience.
