

An Exceptional Intelligence and Cyber Defense provider: **BlueVoyant**

“BlueVoyant’s team represents that rare combination of technical prowess and savvy business advisory services.”

As technology continues to evolve so does the opportunities and challenges. Cyber security is one of the major challenges that the world is facing today. The sophisticated cyber attacks involving malware, phishing, machine learning and artificial intelligence, cryptocurrency and more have placed the data and assets of corporations, governments and individuals at constant risk.

The increasing prevalence and severity of malicious cyber enabled activities constitute an unusual and extraordinary threat to the national security, foreign policy and economy. To overcome such challenges BlueVoyant brings an Exceptional Intelligence and Cyber Defense management to its clients. It provides advanced cyber threat intelligence, managed security services and proactive professional services with forensic capabilities for incident response and remediation.

BlueVoyant helps large enterprises with impactful intelligence and it offers small and medium enterprises the same kind of software and level of services that large

enterprises enjoy from a world-class team of experts that would be challenging to amass directly. BlueVoyant protects its clients from agile and well financed attackers with exceptional cybersecurity defense and protection through technology and tailored services. It provides comprehensive cybersecurity services and technology to augment, enhances, or replaces your current solutions.

Transforming the way businesses think about cyber risk

In 2017 BlueVoyant built smarter, from the ground up and assembled a team of engineers, analysts, and security professionals with a passion for innovation and problem-solving with a unique purpose and with unparalleled support - to protect organizations of all sizes against agile and well-funded adversaries.

BlueVoyant’s Threat Intelligence Services monitor the external attack surface, assess emerging risks, and deliver timely, actionable intelligence specific to the organization and the entire supply chain.

Its advanced Cyber Threat Intelligence Service goes beyond the company’s boundaries to see the real threat actor and find activities taking place outside perimeter.

BlueVoyant provides advanced warning of impending cyber attacks days or weeks before other services and reduce the risk of attack from malicious Internet infrastructure. It enriches your alerts with external threat intelligence which informs investigations and identifies attacker infrastructure and prioritize threats to eliminate those that put your business at a great risk. BlueVoyant also assess third-party risk, based on external monitoring of threats, attacks and vulnerabilities to identify weaknesses in the entire supply chain before they can be used to steal data from you and your clients.

How BlueVoyant helps with their unique solutions

BlueVoyant combines an expert team, comprehensive threat data analytics, and comprehensive services and solutions to address the multiple cybersecurity needs of

businesses today. Their Managed Security Services helps clients to achieve the same level of security which was previously available to only the largest, most well-defended organizations.

Keeping the bad guys out is a difficult job, discovering them and completely ousting them after they are inside is much worse. Hence, BlueVoyant combines proven front line experience responding to

advanced cyber threats with the expertise in building world class defensive cybersecurity programs to stop threat actors in their tracks.

The intelligence experts interact with the real threat actors in the deep and dark web as well as in chat rooms where they conduct business. The cyber forensics and incident response services are provided by former FBI Cyber Agents,

NSA experts, and military cyberse-
curity specialists.

BlueVoyant Professional Services, armed with deep insight and expertise, help advance your security posture and mitigate risks to your enterprise in the event of a breach. CyberProtect from strategic partner Fiserv is designed to deliver BlueVoyant protection and to keep financial institutions of all sizes safe from targeted cyberattacks. 

“Our clients have been consistently impressed with their practical approach to solving cybersecurity problems and their ability to quickly get to the bottom of complex issues!!”

Jim Rosenthal, The architect of BlueVoyant

Jim Rosenthal is the Chief Executive Officer and co-founder of BlueVoyant. He was the Chief Operating Officer of Morgan Stanley until 2017. At Morgan Stanley, he was responsible to the CEO and the Board of Directors for Cybersecurity.

He is the co-Chairman of Sheltered Harbor, a consortium of major banks, securities firms, industry associations, and technology service providers with the mission of preserving systemic confidence in the event of a cyberattack.

He is the past Chairman of the Securities Industry and Financial Markets Association, and has chaired its Cybersecurity Committee from 2014-2017.

Jim is the recipient of the 2017 Critical Infrastructure Protection Award from the Financial Services Information Sharing and Analysis Center.
