

Market: Threat Intelligence Services | Managed Security Services | Professional Services
Number of Employees: 200+

BlueVoyant is a big data analytics-driven cybersecurity services company with a mission to protect businesses of all sizes against cyber attackers by providing increased visibility, professional insights, and targeted responsiveness. Through our Threat Intelligence Services, Managed Security Services, and Professional Services, we excel in gathering intelligence, providing cybersecurity defense, and remediating cyber attacks. We help large enterprises with impactful intelligence and offer small and medium enterprises the same kind of technology and level of services that large enterprises enjoy - all from a world-class team of experts.

OUR SERVICES

THREAT INTELLIGENCE SERVICES

EXTERNAL THREAT HUNTING	M&A CYBER RISK ASSESSMENT	BRAND WATCHER	CREDENTIAL WATCHER
Leverage data, analytics, and skilled staff to conduct strategic and scalable proactive threat hunting that provides an early warning for threats targeting the organization.	Comprehensive cyber risk evaluation for merger and acquisition transactions. Non-intrusive assessment to uncover digital assets, vulnerabilities, threats, or compromises.	Protect your clients by rapidly identifying and taking down fraudulent domains, sub-domains, and social media accounts that impersonate your company and steal their credentials.	Find compromised credentials for corporate email domains and email addresses of key personnel in the open, deep and dark web, as well as criminal instant messaging groups.

BlueVoyant Threat Intelligence Services monitor your company’s external attack surface, assess emerging risks and deliver near real-time, actionable intelligence that is specific to your organization and your supply chain. Our analysts profile your network vulnerabilities from an attacker’s perspective and go beyond your company’s boundaries to see threat actor activities taking place outside your perimeter.

MANAGED SECURITY SERVICES

MANAGED DETECTION & RESPONSE (MDR+)	DETECTION-AS-A-SERVICE SM	MANAGED SIEM
MDR+ detects, blocks, and contains malware, ransomware, zero-days, non-malware, and fileless attacks automatically. Remote endpoint incident investigation and remediation is led by BlueVoyant cyber intelligence experts.	Collects logs from applications and on-premise and/or cloud infrastructure to enable advanced threat detection. We leverage proprietary, open-source, and dark web intelligence to expedite triage and enrich investigations conducted by our Security Operations Centers.	Managed SIEM with Splunk® Enterprise correlates and analyzes network logs in real time, aggregating disparate data and applying the latest threat intelligence to filter background noise to identify real security concerns.

BlueVoyant protects businesses of all sizes against agile and well-financed cyber attackers. Moving beyond traditional Managed Security Service Providers, we provide real-time monitoring, vulnerability detection and response, backed by our 24/7 global Security Operations Centers (SOCs). Our customers stay abreast of developing and established threat actors because our team of analysts and cybersecurity experts have the knowledge and resources to provide robust, relevant, and right-sized solutions.

PROFESSIONAL SERVICES

CYBER FORENSICS AND INCIDENT RESPONSE	PROACTIVE SERVICES
<p>In the event of a breach, our team, led by former FBI Cyber Agents, has the expertise and experience to determine the root cause through forensic (host and network) examinations. We conduct remote hunt operations and triage, as well as perform containment and remediation efforts. We can guide clients through the entire breach event cycle, from determining initial breach vector, scope, persistence, and compromised data, to providing notification and litigation support.</p>	<p>Mitigate the risks associated with cybersecurity threats through the assessment, validation, and improvement of your organization's cybersecurity controls. Our approach and methodologies are driven by our knowledge of advanced adversaries paired with our expertise in responding to cybersecurity incidents. We also provide cybersecurity advisory and consulting services aimed at preparing organizations against cybersecurity risk.</p>

BlueVoyant combines proven front-line experience responding to advanced cyber threats with expertise in building world-class defensive cybersecurity programs. Our team's knowledge of attacker methodologies, matched with our access to the latest threat intelligence, enables us to assess, respond, and remediate your cybersecurity events faster.

INVESTORS

BlueVoyant is funded with over \$200 million from two over-subscribed investment rounds to support strategic growth, including research and development.

TECHNOLOGY PARTNERS

We are proud of our best-of-breed technology partners who help us provide leading cybersecurity services from field-seasoned experts through the BlueVoyant Technology Platform. Our partners include Carbon Black, CrowdStrike, Illusive, IronNet Cybersecurity, and Splunk®.

STRATEGIC PARTNER

CyberProtectSM from Fiserv: BlueVoyant has partnered with Fiserv to protect financial institutions from increasingly targeted cyberattacks and fast-moving threats from agile and well-funded adversaries. Fiserv is a global leader in financial services technology solutions.
