

The first 72 hours following the discovery of a data breach are critical. The decisions made carry legal, regulatory, investigatory, and public relations repercussions. During this short time period, every decision is critical and even the most prepared organizations can quickly become overwhelmed.

The importance of having a trusted partner to help guide your organization cannot be understated. Let the BlueVoyant Incident Response Team leverage their expertise and decades of experience to get you the answers you need, putting you and your team in the best position to make the wisest decisions, both efficiently and effectively.

We take a highly efficient investigative approach built on decades of FBI Cyber and private sector experience. The team is field-seasoned and battle tested, having handled some of the most sophisticated cyber breaches.

From forensic collection to the witness stand, we get you the answers you need, paired with a superior investigative perspective.

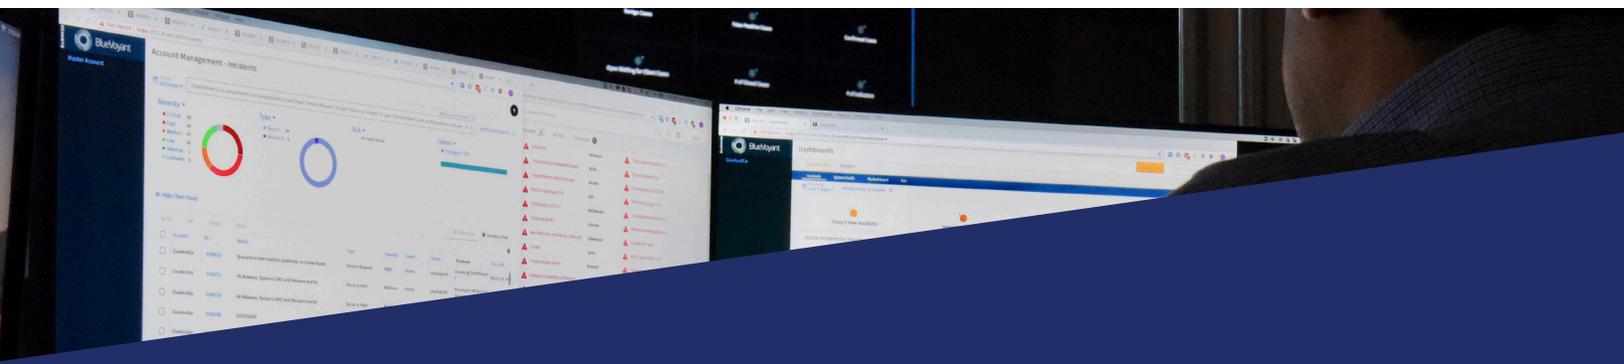

BlueVoyant has served all major industries including, but not limited to:

- Education
- Finance
- Healthcare
- Technology
- Manufacturing
- Government
- Cryptocurrency
- Legal
- Entertainment

The BlueVoyant IR Team has expertise in handling all aspects of complex data breaches. Some of the most common include:

- Ransomware
- Business Email Compromise
- Insider Threat
- Cryptocurrency Theft Compromise
- Intellectual Property Theft
- Full Network Breach
- Unauthorized Access
- Malware Analysis
- Deep/Dark Web/OSINT Investigations
- Litigation/Trial Forensic Support
- Full Network Threat Hunting

THE BLUEVOYANT DIFFERENCE

A mission-driven investigative approach. Customized investigations focused on the needs of the client. No cookie cutter playbooks or commoditized response, only a finely tuned holistic approach to investigations.

Deep experience and expertise. BlueVoyant's IR Team has deep digital forensic and incident response expertise arising out of decades of work on complex data breaches involving the most sophisticated criminal, nation state and hacktivist actors.

The BlueVoyant IR Team views each engagement as a partnership. We work with your existing IT security team as well as all major insurance carriers and data privacy counsel.

Exclusive access to one of the largest collections of global internet traffic and dark web data in the world. This includes active/passive DNS, compromised credentials, and related dark-proxy/VPN data collected in real time.

ABOUT BLUEVOYANT

BlueVoyant is an analytic-driven cybersecurity company whose mission is to protect organizations of all sizes against agile and well-financed cyber attackers. Founded and led by experts in the cyber security and government security sectors, BlueVoyant's offerings are built with real-world insight and applicability, plus an eye on the threat horizon.

Through our Advanced Threat Intelligence, Managed Security Services, and Professional Services, we excel in intelligence gathering, cybersecurity defense, detection of attacks and response coupled with remediation.

Our SOC's around the world keep us on top of developing and established threat actors and the well-financed tools they are developing to out-smart traditional security measures. Our 24/7 SOC's, offices around the world, and our security analytics platform positions us to best help our customers defend against emerging cyber threats.
