

BlueVoyant has a proven track record of successful litigation support in matters involving:

- Class action identity theft
- Data breaches involving Personally Identifiable Information (PII) and Protected Health Information (PHI)
- Trafficking of breached/leaked data on the dark web and in illicit online communities
- Cybercriminal fraud schemes
- Open-Source and dark web plaintiff background investigations
- Expert testimony

CLASS ACTION LAWSUITS PERTAINING TO IDENTITY THEFT MATTERS

Our experts can testify on key issues, such as:

- Demonstrating precisely how PII, PHI, and other data is used to commit fraud
- Articulating what differentiates actionable data from data that does not advance criminal schemes
- Explaining illicit dark web data markets - what is obtainable
- Dispelling false characterizations of internet fraud schemes and exaggerated claims about the impact of a non-sensitive data breach

DARK WEB & OPEN SOURCE INVESTIGATIONS

BlueVoyant Open Source and Dark Web Investigators are experts in identifying the entirety of a subject's online presence. We have uncovered case-altering material related to criminal behavior or behavior contrary to sworn depositions.

COMPROMISED CREDENTIALS INVESTIGATION

BlueVoyant maintains a vast repository of compromised data sourced from illicit online communities hosted in the dark web.

Our analysts are able to investigate email accounts associated with individuals and uncover the following potential intelligence associated with the subject of the investigation:

- Data compromise events affecting the subject
- Compromised Personally Identifiable Information (PII)
- Additional email accounts
- Other online accounts, including social media accounts

EXPERT TESTIMONY

Where appropriate, BlueVoyant can offer expert testimony on relevant matters. Our employees have cultivated expertise and credibility over the course of their careers in the FBI, NSA, and private sector.
