

ASSESSMENT BASELINES HELP PRIORITIZE CYBERSECURITY IMPROVEMENTS

The U.S. Department of Commerce’s National Institute of Standards and Technology (NIST) has developed a guide for assessing the security controls within federal information systems and organizations.

This NIST Guide establishes common assessment procedures to evaluate the effectiveness of security controls and ensures that companies are using consistent, comparable and repeatable security assessments of cybersecurity systems. It is considered an industry standard for comprehensive security posture assessment.

HOW NIST HELPS

BlueVoyant uses the NIST guide in conjunction with our own carefully developed proprietary framework. We use it as part of a larger, holistic plan to help clients develop awareness of their existing deficiencies and recommended improvements.

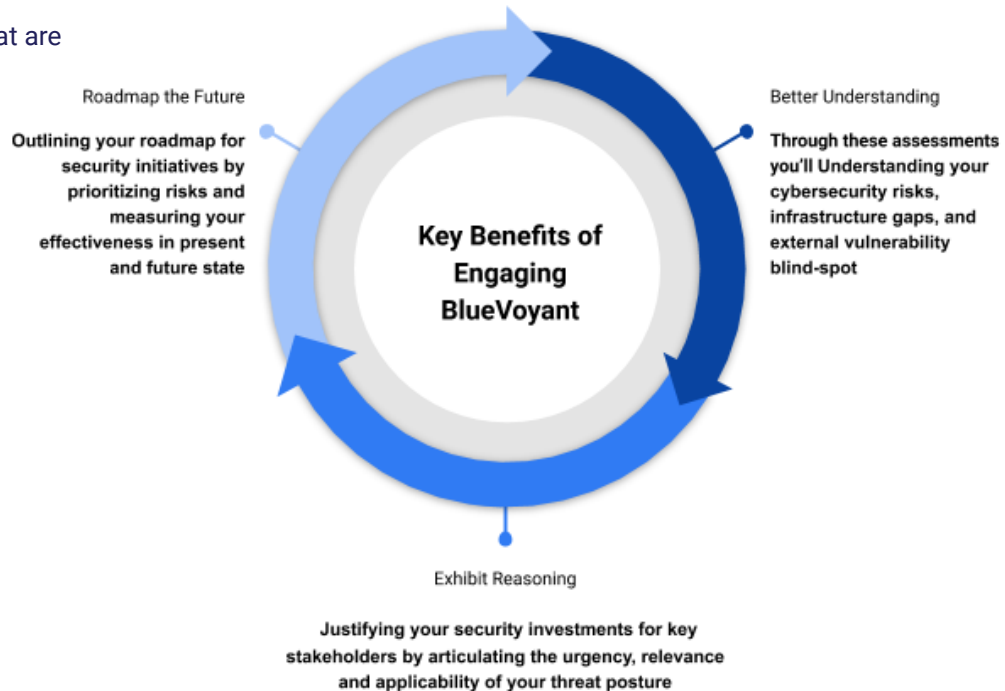

As a starting point for developing more specific assessment procedures and targeted plans, BlueVoyant works with IT teams to create organization-specific recommendations that are robust, relevant and right-sized.

ENGAGING BLUEVOYANT

Some of the key benefits of engaging BlueVoyant include the ability to gain a better understanding, present better documentation, and prepare in a more robust way for the future,

PREPARE FOR UNIQUE CHALLENGES

While the NIST Guide provide best practice standards, BlueVoyant’s Professional Services team uses their field-experience to augment our cybersecurity assessment of your organization. We see NIST assessment as a way to quantitatively measure your effectiveness across cybersecurity operations

HOW WE WORK

When you engage BlueVoyant, we will assess the current state of your cybersecurity posture and maturity by comparing your current state against industry-standard frameworks (like NIST) and best practices. After evaluating your technology and interviewing your key staff, we will provide a report on your exposure points. Our report will include counsel on your unique challenges and will outline tailored improvements you should employ. These recommendations will help you to plan using your unique risk profile, budget, resources, policies, and compliance needs.

ABOUT US

A first-things-first cybersecurity company focused on delivering best-of-breed technology and outstanding customer service to businesses around the world. We believe in the democratization of cybersecurity - offering robust solutions and tools to businesses previously ignored and underserved. Through our advanced Threat Intelligence, Managed Security Services, and Professional Services, we excel in intelligence gathering, cybersecurity defense, and detection of attacks with response coupled with remediation. With global SOCs, we are prepared to protect the world over from well-financed threat actors and their newest tools of attack.

BLUEVOYANT THREAT INTELLIGENCE ADVANTAGE

The services of BlueVoyant's Threat Intelligence, Managed Security Services and Professional Services are mutually reinforced. Our proprietary, global cyber threat data set provides unrivaled threat intelligence. As a BlueVoyant client, you will have access to our experts who will employ this data to guide our recommendations.

Our team of field-seasoned experts have deep experience in both the public and private sectors and use their knowledge to inform clients on the most applicable threats. From Fortune 500 company leadership to global intelligence communities, our team has seen the threat landscape and is prepared for the constant changes. We plan for the evolving threat horizon and create recommendations that help you to be better prepared for the future.

ENGAGE ADDITIONAL SUPPORT

When conducted alongside the deployment of our Managed Security Services offerings, our Professional Services team can help provide greater context for your risk level. Whether you're looking to safeguard your business image, encourage financial investment, or simply create a more robust plan, the Cybersecurity Assessment can help you expedite smarter cybersecurity improvements.
