

BLUEVOYANT MANAGED DETECTION AND RESPONSE PROVIDES EARLY DETECTION AND REAL-TIME RESPONSE TO CYBER THREATS.

Every organization is a target for cyberattacks, but not all cybersecurity budgets are created equal. Businesses of all sizes must protect themselves against the same sophisticated and fast-moving threats as the largest enterprises, but with much less budget and fewer resources.

### Elite cybersecurity available to businesses of all sizes.

BlueVoyant is working to build a more secure world by making elite cybersecurity available to the businesses that need it most – yours. We have built a best-in-breed security operation, delivered by industry veterans from the global public and private sectors, and supported by proven technology. With BlueVoyant on your side, you can operate with the confidence that you're ready for anything.

BlueVoyant MSS provides the most comprehensive endpoint detection and response available. With 24 x 7 global detection, monitoring and response, augmented by threat intelligence, BlueVoyant predicts, detects, investigates, and contains attacks before they impact your business.

**“The hackers have long since been organized – it’s time we do the same in the private sector.”**

Jim Rosenthal,  
CEO of BlueVoyant

## Key Benefits

Minimize impact of attacks and lower costs with real-time remediation and faster response times.

Reduce the risk of data loss and business disruption due to successful attacks.

Identify the root cause and correct it, continuously strengthening your security posture.

## Differentiators

Intellectual capital and playbooks previously only available to the largest and best funded enterprises and government agencies.

Talent led by highly experienced cyber professionals from the public and private sector.

Only the most advanced cybersecurity products with uniquely comprehensive threat intelligence and highly effective Security Operations Centers.

## See more

Advanced endpoint and network monitoring powered by exclusive threat intelligence normally accessible only to the largest institutions.

### Threat intelligence and context to predict and defend against attacks.

BlueVoyant's threat intelligence is much more than the traditional threat feeds other MSSPs and MDR vendors may deliver. We have exclusive rights to the most extensive data set available to the private sector. Our skilled team analyzes this data to understand deeper meaning and context, allowing us to know which threats are truly relevant to your organization.

This elite intelligence combined with advanced endpoint protection and machine learning delivers unparalleled visibility for our customers.

## Understand Better

Playbooks from former senior government and private sector cybersecurity leaders, implemented by a 24/7/365 Security Operations Center that communicates with you through a portal designed by and for our clients.

### Elite experts empowered by the best technology.

Our team is led by the foremost cybersecurity experts from the largest and best defended organizations and government agencies around the world. They investigate and take action against cyber threats using our exclusive threat intelligence.

Our customizable portal is your single vantage point to understand the threats against your business, actions we took to protect you, and recommendations to prevent reoccurrences.

## Respond Faster

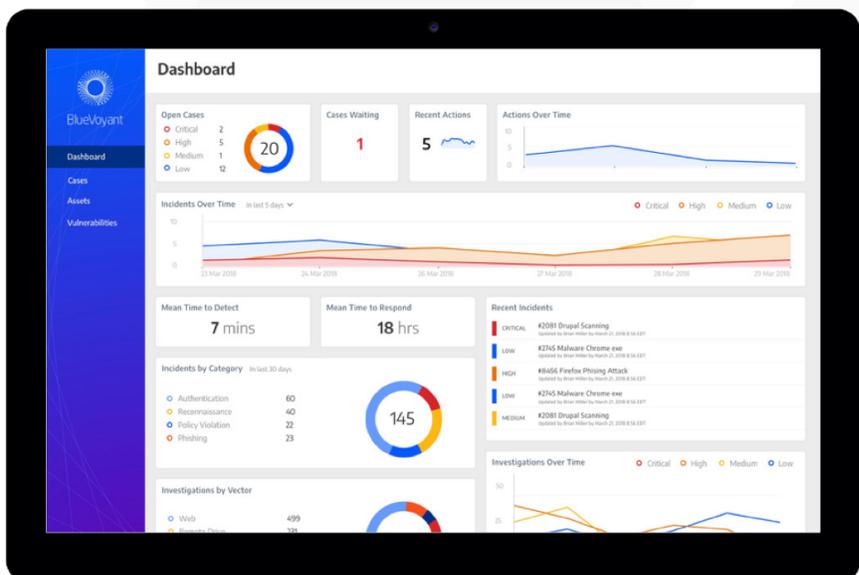

Simplified alerting with available remote and automated remediation comprehensive threat intelligence and highly effective Security Operations Centers.

### Threats move fast. BlueVoyant moves faster.

We minimize the impact of attacks by utilizing pre-approved playbooks to automate threat response, reducing the time an adversary can have on your network.

In a world where other providers tell you what to do, we tell you what we did. Because every second counts when your organization is under attack, we detect, investigate, and take action, so you can focus on your business.

Gain an immediate understanding of cyber threats, actions taken, and remediation.

## I MSS Service Details

## Features

**Global Security and Threat Operations**

24x7 always-on, cloud-based operations and threat analysis.

**Advanced Endpoint Defense**

Automatically detect, block, and contain malware, ransomware, zero-days, non-malware and file-less attacks.

**Real-time Incident Response**

Real-time, remote endpoint incident response led by investigators and cyber intelligence experts.

**Security Event Automation**

Orchestration & automation of security alerts to triage and reduce false positives to focus on real threats.

**Advanced Threat Intelligence**

“Outside the Enterprise” Internet and dark web threat intelligence alerts utilizing the largest databases of activity.

**Executive and Threat Intelligence Reports**

Access to operational and threat intelligence reports to understand your security program health and risk.

**Vulnerability Detection**

Regular scanning of computers/servers/networks to identify vulnerabilities for machines at risk.

**Compliance Reporting**

See compliance risks and reports related to your company & security program.

**Asset Discovery**

Accurately determine the devices that exist on your network to inform security response plans.

**Log Management**

Unify alerts, events, and raw logs from endpoint, network, third party applications, and threat intelligence.

**Network Intrusion Detection**

Rapidly identify anomalous user activity that could indicate malicious activity or insider threats.

**Deception Technology**

Deploy next generation honeypot technology to detect adversary non-malware-based attacks used by APT.

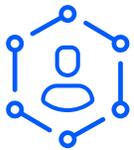

### SOC Talent

Team of experienced analysts that cumulatively hold over 50 certifications such as CISSP, GCFA, GCFE, and GCIH.

### Global Scale

Scale of team in two global locations allows for effective back up.

### Experienced Leadership

Highly experience SOC Leaders who have built and managed SOC's for Fortune 500, Private, and Government Organizations.

### Client Experience Team

Technical Account Teams designed to each client to be your security advocate and advisor.

### Client Implementation Team

Highly skilled and efficient implementation team.

### Compliance & Certification

Specialized team focused on documenting and implementing policies and procedures to comply with SOC II and bank regulatory standards.
