

Records Management that creates long-term operational efficiencies and complies with regulation

Legislation is driving the need for rapid digitisation in the healthcare sector. Regulators are increasingly demanding improved healthcare technology to help enhance the patient experience as well as increase efficiency and reduce costs. How can you ensure your organisation is prepared to meet these challenges?

EDM's information management solutions are enabling healthcare providers to deliver paperless services:

#### THE CHALLENGE:

### Digitising patient records

#### How EDM's record management solutions addresses this need:

- Scans all existing patient notes within the existing onsite and offsite medical records library storage, to make them available electronically to all staff, aiding patient care.
- Accesses, organises, controls and distributes increasing record library volumes securely and efficiently across different systems, providing improved productivity as well as legislative compliance.
- Integrates with internal hospital systems, providing a single view of the patient.

#### Benefits of EDM solutions:

- Enhances efficiency for healthcare staff—supporting the need for quick, safe and secure access to patient medical records.
- Better use of critical resources – allowing focus on patient care rather than administration.
- Reduces the risk of misplaced records.
- Provides accurate and relevant patient information.

#### THE CHALLENGE:

### Tracking patient records

#### How EDM's record management solutions addresses this need:

- Accesses and books patient records out of Patient Administration Systems into boxes for transit.
- Uses barcodes to record the location of records at any point in the process.
- Allows documents to be delivered within agreed time frames.
- Tracks sections within individual records.

#### Benefits of EDM's solutions:

- Ensures all patients records are easily located.
- Reduces the risk of misplaced records.
- Allows clinicians to focus on patient support rather than administration.

Records Management

## THE CHALLENGE:

# Storing medical records

## How EDM's record management solutions addresses this need:

- Allows all patient records to be stored offsite.
- Collects and scans patient records at EDM's off-site facility, immediately freeing up storage space.
- State-of-the-art facilities and systems to securely store your documents in purpose-built accommodation.
- Enables you to register, collect, scan, index and track each patient record online within rigorous service level agreements.

## Benefits of EDM's solutions:

- Secure and instant access to records.
- Generates significant real estate space savings.
- Authorised users have access to all patient's records with the touch of a button.
- Reduces the risk of misplaced patient records.

## THE CHALLENGE:

# Accessing patient data quickly

## How EDM's record management solutions addresses this need:

- Scans and transfers existing medical record libraries.
- Provides a rapid response service ensuring scanned records are accessible within two hours.
- Data transfers to NHS Trust's digital libraries are performed via a secure data link that ensures patient confidentiality standards.

## Benefits of EDM's solutions:

- Records are viewable immediately from anywhere within the Trust.
- Improves security and confidentiality standards.
- Secure data links ensure only authorised personnel can access patient records instantly.

## About EDM Healthcare

EDM Group is a trusted provider of digital information management services to the healthcare sector. We have undertaken some of the largest and most challenging medical-record digitisation projects in the UK and are well placed to replicate that experience, streamlining back-office operations where there is equal scope for improved efficiency and cost reduction.

15 million medical images scanned every month

Services provided to over 45 NHS Trusts

30% reduction in paper handling costs

Strict quality and control measures aligned to ISO 27001 and ISO 9001 standards
