

# SmartHomes

The global smart appliance market is expected to reach

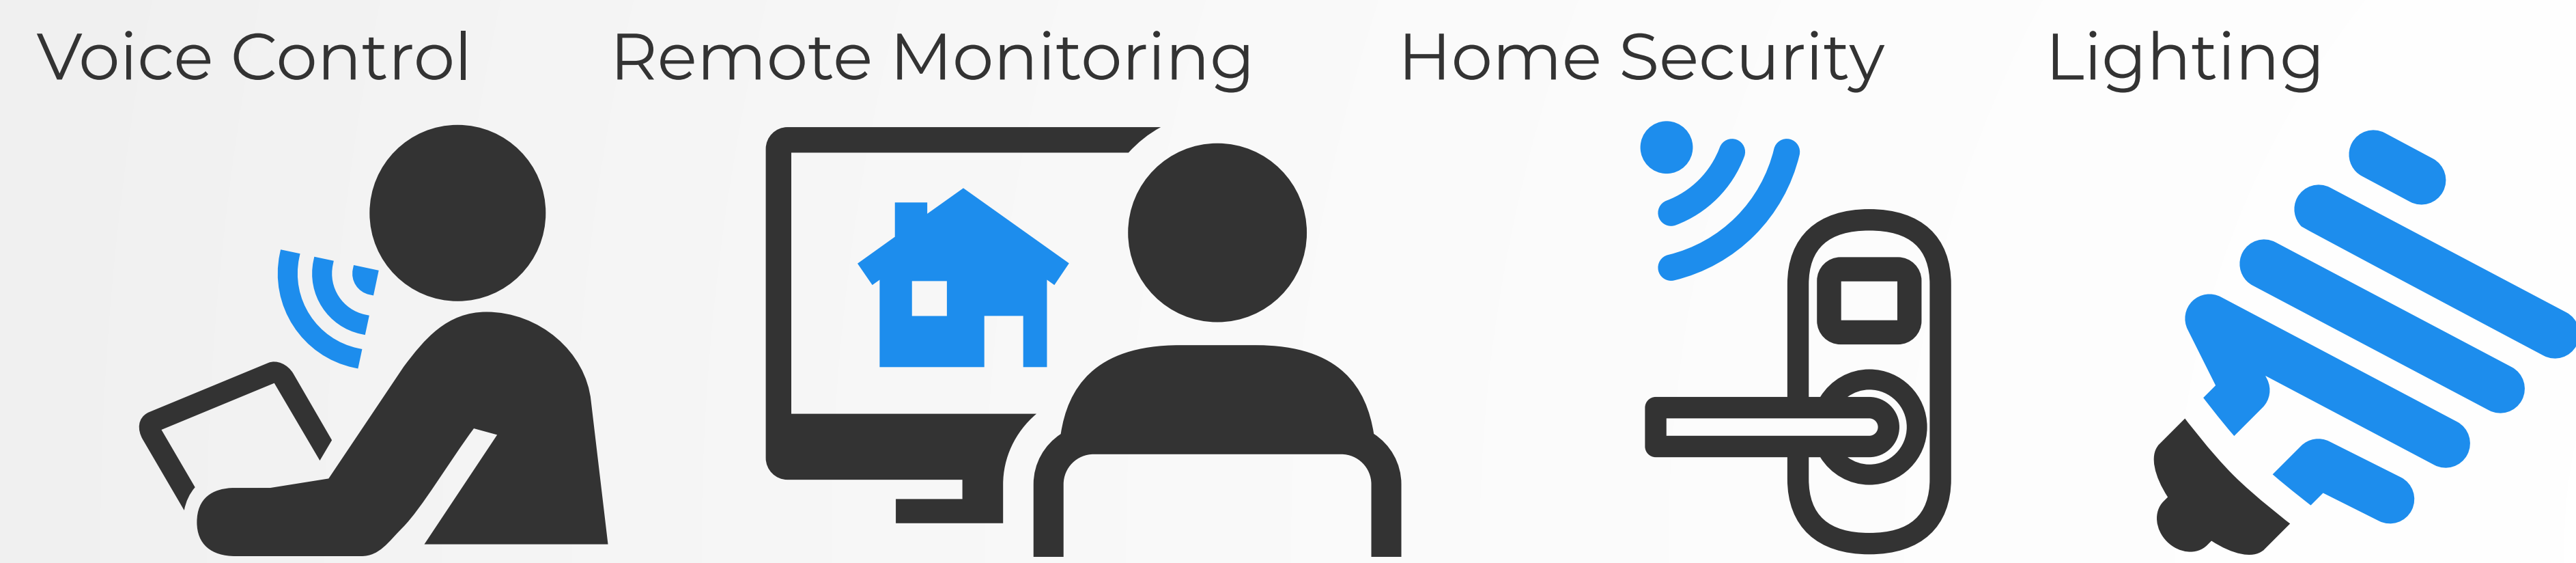

**470 million** units by 2020

In 2020, it is estimated that the internet of things will generate revenue exceeding **\$300 billion**

## CURRENT TRENDS OF SMART HOME APPLIANCES:

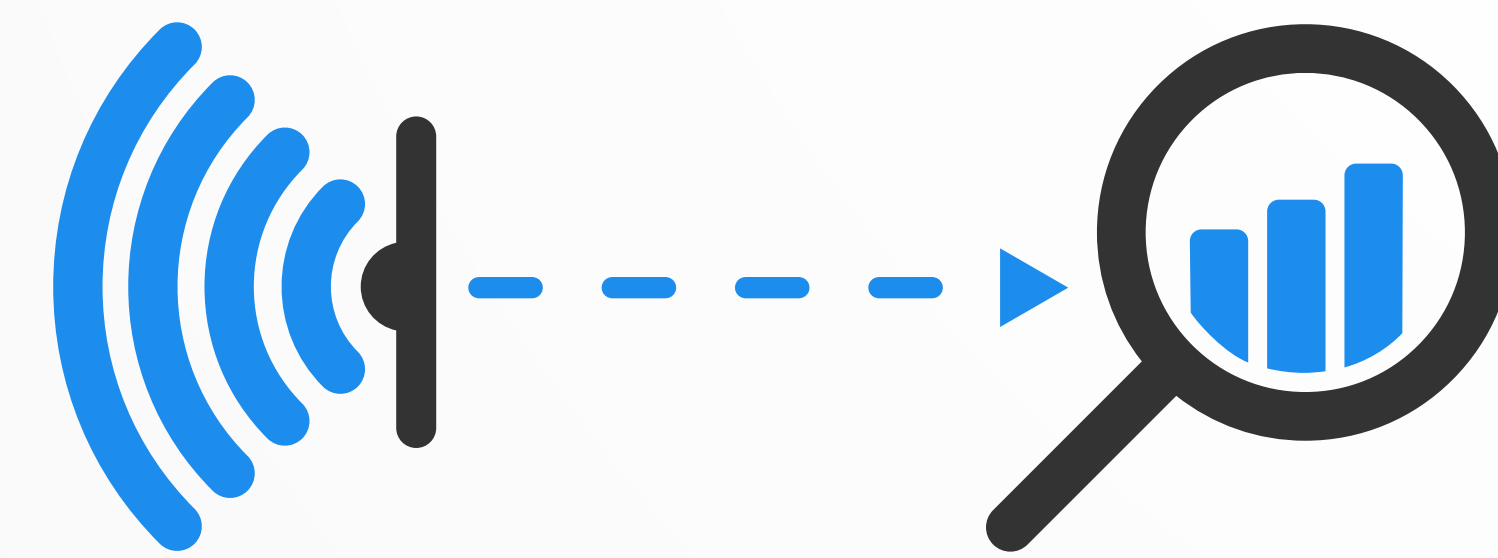

## SMART HOME TECHNOLOGY

allows users to monitor their connected home devices from networked devices.

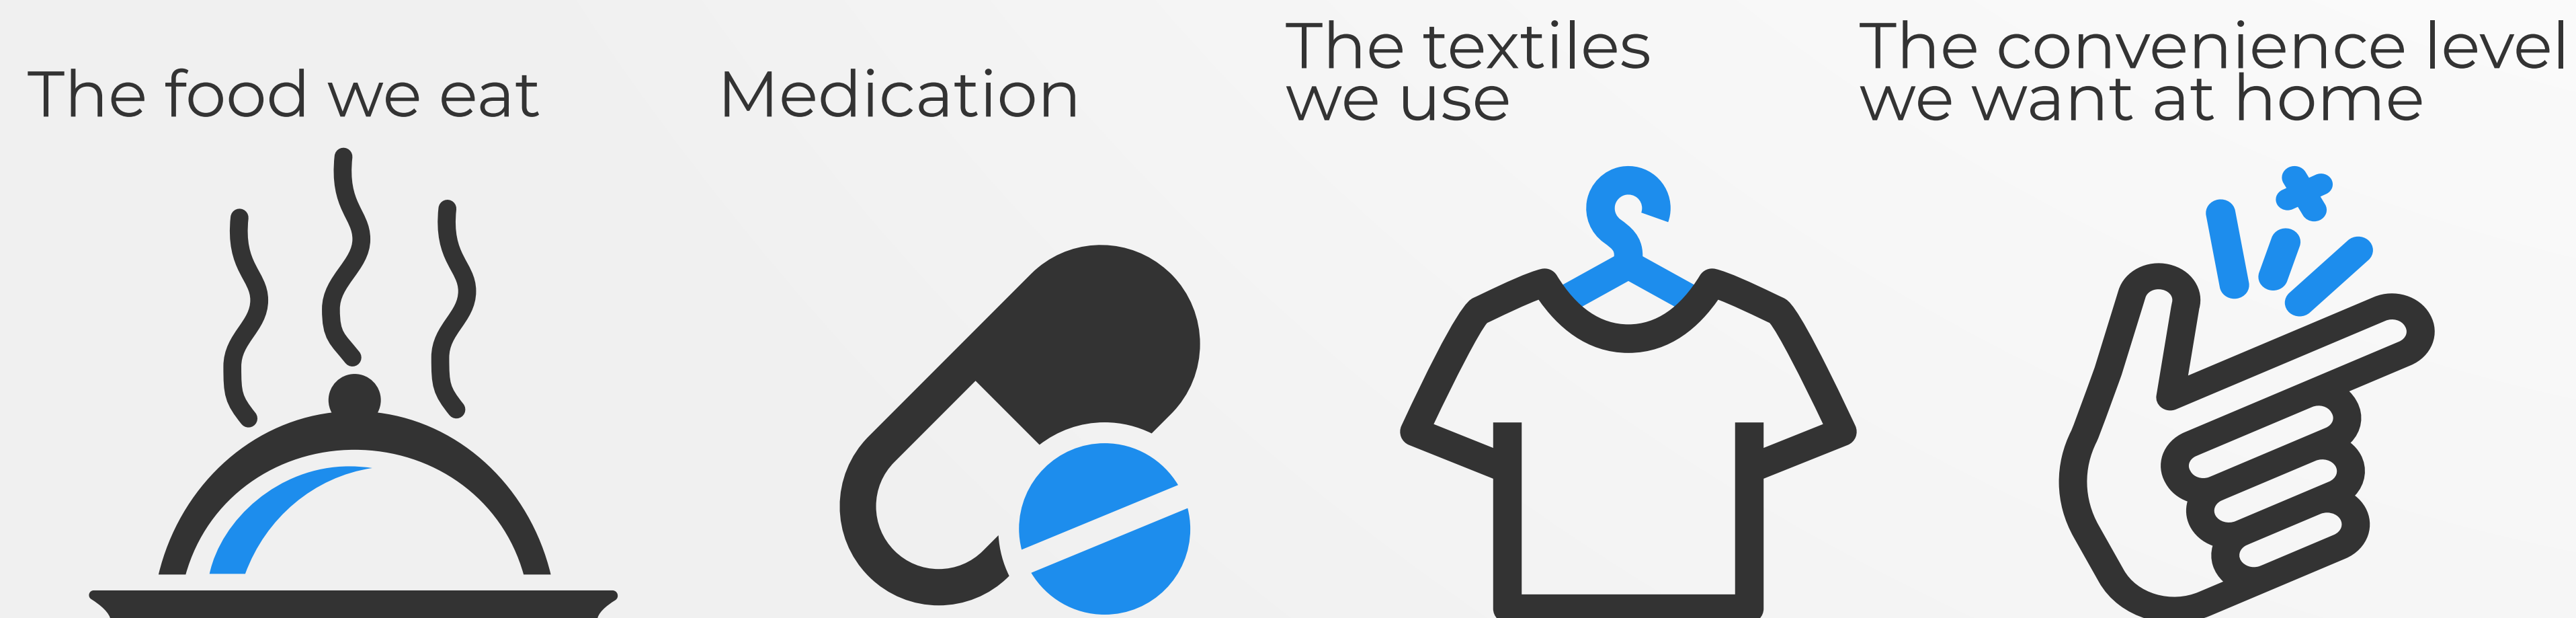

## THE FUTURE OF SMART HOMES

Smart material scanners gather data from sensors and then use this data to make informed decisions.

## INTELLIGENT SENSOR TECHNOLOGY WILL HELP CONTROL AND ANALYZE

## OTHER POTENTIAL APPLICATIONS FOR INTELLIGENT MATERIAL SENSORS
