

# AERIAL PLATFORM OPERATOR

## Scissor Lift / Boom-Lift Training Certification

- ✓ For Beginners and Experienced Operators
- ✓ Fulfills OSHA Requirements

## ON-SITE TRAINING AT YOUR FACILITY

If you have five or more operators, we offer training at your facility.

## COURSE CONTENT

- Review related standards from OSHA, and ANSI
- Operating unsafe equipment or performing unsafe acts
- Outline penalties for improper use of equipment
- Lifting device and mobile equipment definitions
- Complete review of “fall arrest” required, and recommended
- Pre-shift equipment inspections and pre-shift work area inspection requirements
- Review site specific hazards and controls for safe operation off a man-lift
- Review of safety decals, load capacities and specific equipment requirements

Upon successful completion, Certificates and Wallet Cards will be issued to those who complete both the written test and hands-on driving evaluation.

### This Program is Divided into Two Segments

This course provides participants a general understanding of the safe and efficient operation of “Power Operated Mobile Work Platforms.” Participants will be able to identify specific health and safety hazards associated with operating man-lifts.

Part 1 - Includes an in class course with formal lecture and instruction, along with competency evaluation and written exam.

Part 2 - Consists of pre-shift operator inspection and hands on driving with evaluation which will measure the individual’s ability to operate a specific aerial-lift, in a safe manner.

*Combination Forklift & Aerial Lift On-Site Training & Certification is Available Upon Request.*

## YOUR COST

- 5-19 operators - \$175 per person
- 20 or more operators - \$150 per person
- Add \$25 for weekend or evening classes.

Upon successful completion, Certificates and Wallet Cards will be issued to those who complete both the written test and hands-on driving evaluation.
