School Overview

The University of Surrey was established on September 9, 1966 with the grant of its Royal Charter, but their roots go back to a late 19th-century concern to provide greater access to further and higher education for the poorer inhabitants of London. They've formed close partnerships with other institutions and businesses, reaching across geographic boundaries, and used those relationships to bring potential to life. The University of Surrey is a global community of ideas and people, dedicated to life-changing education and research. With a beautiful and vibrant campus, they provide exceptional teaching and practical learning to inspire and empower their students for personal and professional success.
