

Microencapsulated Nutrients For Gummy Vitamins

Watson's Microencapsulated Nutrients designed Especially for Gummies

- Reduce overages – saves money
- Saves space, allowing more load in the gummy
- Improves stability – reduces degradation
- Improves flavor profile

Our Microencapsulated Nutrients designed Especially for Gummies

- Will NOT impact pH
- Will NOT negatively impact quality of gummy

We Microencapsulate with ethyl cellulose to reduce degradation due to processing conditions:

- Ascorbic Acid 85% EC
- Choline Bitartrate 85% EC
- D-Calcium Pantothenate 85% EC
- Ferric Orthophosphate 85% EC
- Folic Acid 85% EC
- Riboflavin 70% EC
- Custom encapsulations always available
