

## Hazardous Substances Course

Workplace injury, illness and disease resulting from exposure to hazardous substances can be prevented in the workplace.

### **Why we developed this program?**

The aim of this course is to provide general induction training for workers who may use, or be exposed to, hazardous chemicals in the workplace.

### **Who should attend?**

Anyone involved in the management, transport and use of hazardous substances in the workplace. Small to medium business owners, managers and supervisors should also attend so that they will have the same understanding as employees, in addition to knowledge of their specific management duties.

### **What will be covered?**

Participants will be given opportunities to learn about:

- National (and state/territory) hazardous chemicals/substances legislation
- Hazards related to the use of chemicals in the workplace and how to identify these
- The health and safety implications of the use of hazardous chemicals in the workplace
- How to participate in risk assessment and control activities in the workplace.

In addition to the above learning objectives, supervisors and managers will have sufficient information to:

- Ensure that employees and others work safely
- Ensure compliance with statutory duties and common law
- Ensure compliance with the organisation's policies.

***Comprehensive participant notes and up to date supplementary information will be provided.  
This course can also be delivered onsite at your premises. For more information call Work  
Safety Hub on 1300 610 059 or register online.***
