

# IQR

My hospital will be ready to meet their IQR reporting requirements.

Successful reporting of quality data that demonstrates superior performance is essential for value-based payments and public reporting programs.

**Medisolv has an IQR solution for you.**

## IQR Solution

### Inpatient Quality Reporting (IQR) Program

Medisolv's quality reporting software, ENCOR, is an industry-leading, ONC-certified application designed to assist hospitals in meeting their reporting requirements for the CMS Inpatient Quality Reporting (IQR) program.

## Capture, Validate, Monitor and Submit

### Capture

- All hospital eQMs and abstracted measures for CMS and The Joint Commission are fully supported.
- Supports 500+ measures including eQMs, abstracted and claims measures.
- Data is refreshed daily for timely visibility into measure performance.
- Data extraction and normalization from multiple EHRs, if necessary.
- Timely annual updates of specifications.

### Validate

- Medisolv's clinical consultants work with you to test and validate your data to produce accurate results.
- "Smart" abstraction worksheets are supplemented with EHR data.
- Data capture workflow optimization.
- On-demand and live regulatory education and guidance.

### Monitor

- Drill down to patient, practice and provider-level details.
- A visualizer tool that simplifies your understanding of the measure logic.
- Dashboards centralize your quality measures and provide insight to make better informed decisions.
- Compare performance against internal goals and national benchmarks.

### Submit

- Proactive management of submission deadlines.
- Medisolv will submit your hospital's reporting files to CMS and The Joint Commission on your behalf.
- Assistance in resolving rejections.
- ENCOR saves submission data snapshots for use in case of future audits.
- Post submission audit assistance.

## Why Medisolv

- Medisolv's ENCOR software has earned the exclusive endorsement of the American Hospital Association.
- In the 2017 KLAS Quality, Patient Safety and Risk Management report, healthcare executives rated Medisolv number one in helping them to adapt to regulatory changes.
- Medisolv has successfully submitted quality data to CMS for providers since 2014.
- No Medisolv hospitals to date have received a CMS penalty for failure to successfully report in any year.

Unlike other vendors, Medisolv's software doesn't end with implementation. Our clinical consultants have spent, on average, 15+ years in the hospital setting. They work with you to test and validate your data to produce accurate results. When it comes time for submission to regulatory programs, your consultant submits the data on your behalf. No extra work needed!
