

OPAL Provider Performance

Easily meet your hospital's
OPPE requirements for
The Joint Commission.

Allow your Medical Staff Office to better manage their workload while ensuring accurate and effective OPPE compliance.

Medisolv has a provider performance software solution for you.

Provider Performance Software

Medisolv's provider performance software, OPAL, automates the process of gathering performance data on individual providers and compares them to their peers – by specialty – using data extracted directly from the MEDITECH Data Repository.

Extract data directly from the MEDITECH DR

Focus on physician care by comparing physicians' performance against their peer groups, using provider information pulled directly from your MEDITECH DR.

Evaluate based on measure results

Users can view pertinent physician data, including readmission and mortality rates, length of stay and patient outcomes.

Compare physicians to peer groups

Categorize physicians into different specialties and pair those physicians with specific measures.

OPAL Software Features:

- Ability to annotate and document reviews in provider-specific files.
- Upload documents to support the review process.
- Monitor and identify upcoming reviews for providers by user-defined time periods.
- Assign responsibility of measure results to the Admitting, Discharging or ED Physician or the Principal Surgeon instead of assigning everything to the Attending.
- Place providers on FPPE and monitor them more frequently as needed.

Analyze Providers by:

Patient outcomes based on Patient Safety and Quality measures

CMS and The Joint Commission Core Measure results

Utilization of resources for their top 10 DRGs

Patient length of stay

Mortality Rates

Readmission Rates

Why OPAL

OPAL is directly integrated with the MEDITECH Data Repository (DR). After a quick deployment, requiring no technical resources on your end, you will have easy access to provider results.

OPAL is a complete package solution for your OPPE reporting needs.

Why Medisolv

Medisolv is a KLAS category leader for ability to adapt to industry regulations.

In addition to providing clients with a high-quality software, we take pride in offering extensive guidance and support—beyond initial implementation. Our clinical experts have worked in the hospital setting 15+ years on average and have helped maintain our 95% client retention rate.

To date, over 300 hospitals use and trust Medisolv.
