medisolv™

Hospital Analytic Software Solution

Medisolv's analytic software, RAPID, combines a wealth of predefined content with end-user software tools to empower non-technical workers. Our software makes sense of your MEDITECH data, which allows you to make smarter decisions.

Readmissions
Track and pull reports of readmissions data in historic or real-time.

ED Throughput
Keep a patient's journey on track and measure timestamps throughout the entire visit.

Cost and Profitability
Monitor hospital budgets with financial reports that are updated daily.

RAPID Software Features:

- View, track and analyze relevant data across departments such as quality, clinical, ED and billing
- Directly integrated with the MEDITECH Data Repository (DR)
- Daily updated data allows departments to make timely interventions
- Data includes electronic, abstracted and claims measure results
- Predictive analytics helps manage high risk patients by forecasting their risk of readmission
- Easily build customized reports that can be shared with management on a weekly, monthly or custom basis
- Track actuals vs. budgets for departmental responsibility in near real-time

Impact on Hospital Performance:

↑ Increase throughput & efficiency to reduce cost

↑ Increase revenue and profitability

↑ Improve patient outcomes

↓ Decrease patient length of stay

Why RAPID

RAPID is directly integrated with the MEDITECH Data Repository (DR). After a quick deployment, requiring no technical resources on your end, you will have easy access to all of your MEDITECH data.

Your data is updated daily so you will know exactly what is going on currently in your hospital. RAPID is a complete turn-key solution for your retrospective and predictive analytics needs.

Why Medisolv

Unlike other vendors, Medisolv's software doesn't end with implementation.

Our team of experts is there to guide you the entire time. If your team is looking to create custom reports, we work with you to create the reports that will help your hospital achieve it's goals.
