

# How to Bulk Add Material Images (Supplements)

Kardex Power Pick System

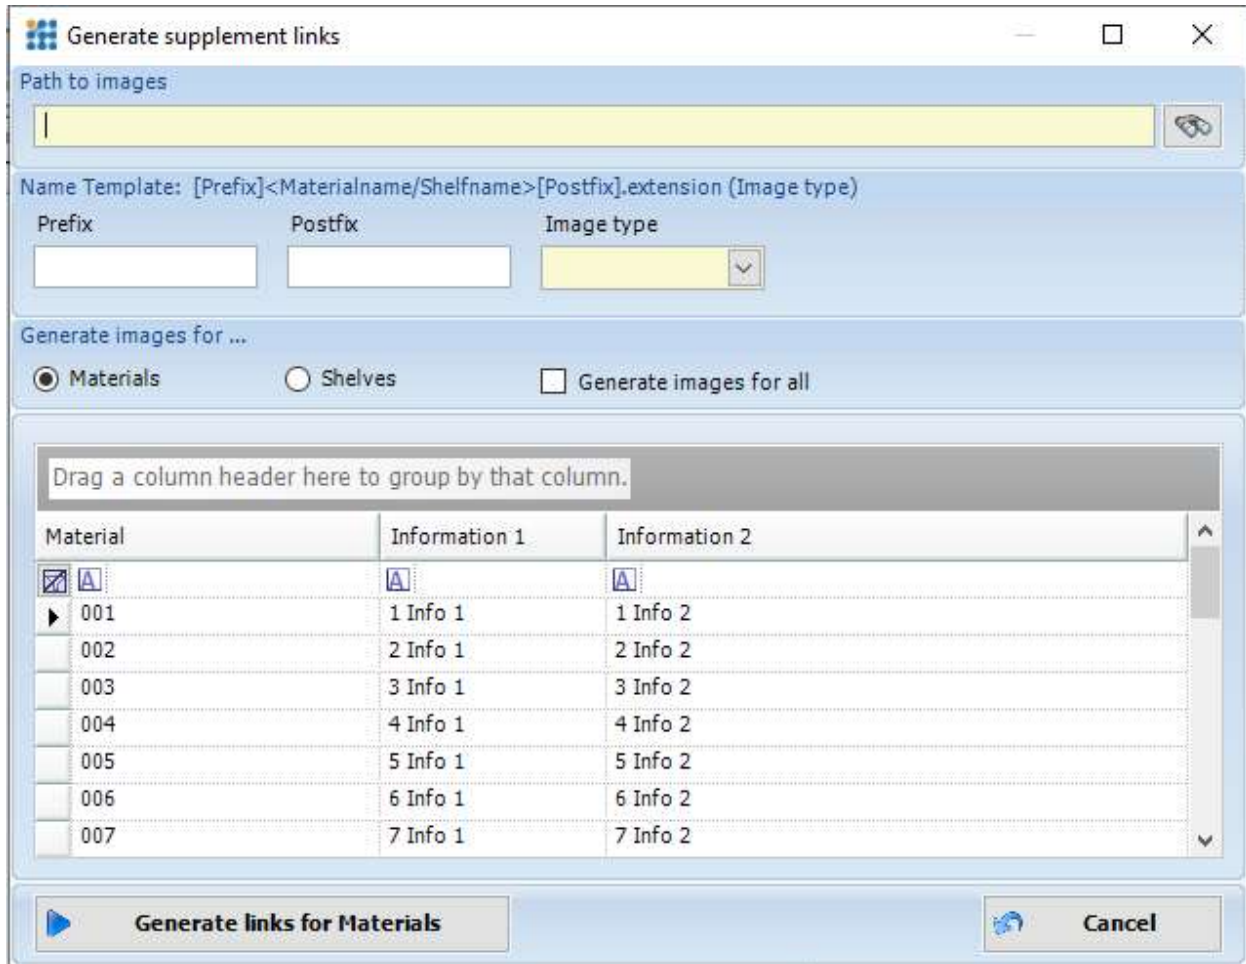

## How To Bulk Add Material Images

---

1. Create a network location where images will be stored. All images should have the same extension and the name of the image should match the material name.
2. Open Management > Supplements
3. Next to “New Supplement” click the down arrow and click “Auto generate...”

4. Give the path where the images can be found

5. Set the “Image type” (extension)

6. Click Generate links for Materials
