

# Power Pick® Global

Auto/CDK Global

kardexremstar

Approved Interface

## Power Pick Global Auto Key Benefits

- CDK Global Approved Interface
- Certified Interface
- Direct link to the CDK Global server
- Fast and reliable connectivity
- Support of the interface from both CDK Global and Kardex Remstar
- On-going integration testing and development of the interface as new releases of the CDK Global DMS and Kardex Remstar software are released
- **Sales and Repair Orders** - are electronically downloaded to Kardex Remstar and parts are delivered automatically to the counter person.
- **The CDK Global parts list** - can be downloaded to Kardex Remstar on initial load savings hours of data input.
- **Parts added, deleted or superseded** - on your CDK Global system will automatically be synchronized with your Kardex Remstar system.
- **Any inventory discrepancies** - will automatically be reported through the DMS reconciliation module.
- **Power Pick Global Auto** - can help with physical inventory by downloading cost information from CDK Global; allowing all parts, a random sampling and high dollar inventory items to be counted; printing count sheets or prompting the operator for each location to count. Once the inventory in Kardex Remstar is proven to be 100% accurate, the stock levels can be electronically uploaded to CDK Global with the click of a button.
- **Picking** can be interrupted for hot picks to meet ever changing delivery and customer demands.
- **Internet connectivity** for HTML-based help files, problem reports, feedback forms, support requests, software updates, downloads, etc.
- **Functions** - can be scheduled to run every night or on-demand as system requirements dictate.

## Kardex Remstar Benefits

- **Reduces Inventory** - Real time inventory status and detailed managerial reports allow users to manage their operations efficiently.
- **Increases Throughput** - Whether optimizing and directing pickers with optimized printed lists, or directing automated equipment using light directed picking systems, Power Pick Global software uses batch picking and put-aways to increase worker efficiencies.
- **Reduces Floor Space Requirements** - Advanced cubing algorithms allow users to maximize every square inch of storage space.
- **99.9% Accuracy** - From creating optimized pick lists, to bar code verification to pick & put-to-light, users of Power Pick Global often see accuracy levels rise to 99.9%.
- **Increases Productivity** - Parts are delivered to the operator eliminating wasted walk and search time, productivity can be increased up to 2/3.
- **Parts** - are kept clean and inventory accuracy is greatly improved.
- **Increases Customer Satisfaction** - By having material on-hand, and orders picked accurately and timely you will be able to offer your customers increased levels of performance.
