

Scientific Program

Igenomix at 2017

Carlos Simón MD, PhD - Spain

Ovarian Biology Satellite Meeting Biomarkers of embryo viability and implantation in the era of precision medicine.

Transcriptomic assessment of endometrial receptivity: Era testing
Wednesday 15th March - 13:30 h. - 14:30 h.

Felipe Vilella, MD, PhD

Mini Symposia I Fundamental and Translational Aspects of Extracellular Vesicles: Focus on the Female Reproductive System.

Dialogue Between the Maternal Endometrium and the Embryo: Potential Impact on Onset Adult Disease
Thursday, March 16 / 2:45 p.m. - 3:15 p.m.

Tamara Garrido, PhD - Spain

SRI Endometrial Satellite Endometriomics in Health and Disease.

Decidualization defect as a possible maternal cause of preeclampsia
Wednesday, 15th March / 15:00 h. - 15:30 h.

Oral Presentations

Authors	Title	Date/Time	Abstract
Nuria Balaguer	Maternal MiR-30d Deficiency Is Associated with Defects in Endometrial Receptivity, Embryonic. Implantation and Fetal Development.	Thursday, March 16 at 16.00	O-045
Inmaculada Moreno	<i>In Vitro</i> Model of Bacterial Colonization for the Study of the Effect of the Endometrial Microbiota on the Reproductive Function	Thursday, March 16 at 17:15	O-050
Tamara Garrido-Gomez	Severe Preeclampsia Is Associated with Resistance to Decidualization.	Friday, March 17 at 14.45	O-115

Posters

Author	Title	Date/Time	Abstract
David Bolumar	Extracellular Vesicles Secreted by the Human Endometrium Contain Specific DNA Sequences That Are Uptaken by Murine Embryos.	Friday, March 17, 10.45-12.15	F-188
