Defend and extend the life of your electronics

Heat is the enemy of extending the life of your electronics. Heat attacks your equipment from all sides: on the outside with extreme variations in ambient temperatures and inside with high thermal loads caused by the high density of components within the enclosure. The challenge is to manage temperatures consistently on both ends of the thermal spectrum in any environment.

Rittal industrial climate solutions lengthen the life of your components, optimize performance and reduce equipment failure. Time is money, and uptime ensures your operations are profitable.

Sources of damaging heat

The trend toward high equipment density in enclosures challenges the heat removal process. Components, even those rated for high heat use, degrade when the heat load rises. Not only do enclosure temperatures rise from the waste heat generated inside but also from external environmental factors.

Deployment of mission-critical enclosures into harsh environments increases the level of heat risk to the components inside. Your thermal control system must manage the impact of any factor that inhibits air flow and increases temperature.

Higher temperatures increase downtime

Generated heat must be removed efficiently or heat damage will occur. Controlling units and microprocessors age quickly under heat pressure. If left unchecked, small nuisance malfunctions may be the first sign of overheating and lead to a sudden catastrophic failure that can cost thousands in downtime costs, and derail your project timeline.

Interior heat consequences

- De-rated power performance
- Trip faults and fluctuations in circuits
- Mean time between failure decrease
- Component set point drift
- Intermittent or catastrophic system failure
- Voided component warranty
- Factory downtime
- Lost revenue
- Delayed shipments
- Customer dissatisfaction
- Component replacement costs

Double the life of your electronics with every 18°F/10°C drop in temperature

Rittal advanced climate control technology is your defense. Our methodical approach ensures the internal temperature is stable and heat-related incidents or costly shutdowns are avoided. Rittal responds to your bottom line demands with a variety of engineered solutions, including exchangers, coolers and air conditioners that handle heat dissipation. Our high efficiency units offer passive and active cooling technology that saves up to 70% in energy costs. These innovative thermal management systems are available only from Rittal.

Exterior heat factors

- Ambient temperature range and humidity
- Factory equipment heat emissions
- Level of dust or dirt
- Exposure to direct or indirect solar radiation
- Exposure to rain, snow, wind
- Presence of corrosive or abrasive chemicals and oils
- Environment requiring high-pressure wash down
- Amount of natural ventilation

Internal heat sources

- Power supplies
- Controllers, drives, servos
- Processors and server racks
- AC drives/inverters
- Microprocessor control gear
- VFD controllers
- Soft starters
- Transformers
- PLC systems
- Communication products
- HMI systems
- Battery back-up systems

The right industrial climate solution

With Rittal, you get certified solutions that have been field-proven to handle the most challenging industrial environments around the world. Every day, across the globe, Rittal is there. From audit to design to manufacturing, we work closely with you to deliver the right solution.

Filter Fans

- UL Type 12
- UL Type 3R, 4, 4X, with optional hose-proof hood
- 12–529 CFM
- Tool-less assembly
- Reversible/diagonal fan motor
- Roof-top design available

TopTherm Air-to-Air Heat Exchanger

- 17.5 to 90 W/K
- 115V and 230V available
- Quick-connecting terminals

Thermoelectric Coolers

- Uses the Peltier effect
- 341 BTU
- Compact, lightweight, efficient
- Multiple mounting positions
- 24V DC or dual 100–240V option

Top Therm Blue e Air Conditioners

- UL Type, 12, 3R/4
- 1,000–15,000 BTU
- Available in wall mount or roof mount versions
- Available in carbon steel or 316 stainless steel 4X
- Nano-coated condenser
- Integrated condensate evaporator
- Multiple mounting positions

Blue e+ Air Conditioners

- UL Type 12 and 3R
- 6,000–20,000 BTU
- Available in wall mount or roof mount versions
- Available in carbon steel or stainless steel
- Touch screen controller
- Nano-coated condenser
- Multi-voltage

TopTherm Air-to-Water Heat Exchangers

- UL Type 12
- 1,000–17,000 BTU
- Roof- and wall-mounted versions
- 115V, 230V, 400V, 3~
- Intelligent comfort controller
- Energy efficient
- Maintenance free
- Optimal for extreme ambient conditions

Chillers: TopTherm and Blue e+

- Centralized, efficient cooling using water
- 3,412–150,000 BTU
- Intelligent comfort controller
- Nano-coated condenser
- Ideal for machine and enclosure cooling
- Multi-voltage

Enclosure Heaters

- UL Type 12
- 30–3,000 BTU
- Maintenance free design
- Positive temperature coefficient (PTC) technology
- Available with or without fans

The right cooling chart for your climate control plan

Rittal climate product capabilities and applications

Climate Product	Cooling Technique	Cooling Capacity	Environments	Applications
Filter Fans	Open-loop forced-air	Low	Clean, cool ambient conditions	IT Infrastructure Industrial Manufacturing
Air-to-Air Heat Exchangers	Closed-loop	Moderate (17.4 – 90 W/C)	Clean to dirty/oily air with cool ambient conditions	Textiles Pharmaceuticals and Biotechnology
Thermoelectric Coolers	Peltier effect Solid state; no moving parts or refrigerant	Low (Up to 100 W)	Limited space availability	Automation Technology Measurement and Control Technology Industrial Electronics and Telecommunications
Air Conditioners	Closed-loop environmentally-safe refrigerant	High (300 – 6,000 W)	Dirty, oily, hot & humid	Food & Beverage Water/Wastewater Renewable Energy
Air-to-Water Heat Exchangers	Closed-loop water-cooled	Highest (300 – 10,000 W)	Extremely harsh locations; corrosive, airborne oil	Metal Production & Processing Paper & Pulp Oil & Gas
TopTherm Chillers	Closed-loop water cooling used with air-to-water heat exchangers	Highest (1,000 – 40,000 W)	Extremely harsh locations; corrosive, airborne oil	Metal Production & Processing Paper & Pulp Oil & Gas

Climate product spectrum based on ambient temperature and environment

The Blue e+ principle

Hybrid Technology: Pioneering Climate Control

The Blue e+ is a completely new generation of cooling units that represents a quantum leap in terms of cost-effectiveness and energy conservation. As well as providing far higher energy efficiency than existing cooling solutions, the units offer a range of powerful new features that provide longer component life, flexibility and ease of use.

Blue e+ features hybrid cooling technology that delivers 75% greater energy savings than competitive products. The cooling mode automatically adjusts to ambient conditions, switching from a passive heat pipe to an active speed-regulated refrigerant circuit or hybrid combination to maintain a constant temperature. This precision cooling aggressively manages internal temperatures to extend the life of enclosure components.

Data collection and analysis with Rittal's new Smart IoT interface data exchange allows relevant operating data and parameters to be shared around the plant and around the world. A multitude of values can be measured and recorded, and seamlessly interfaced with other IoT devices. This ease of access to energy data management improves efficiency and lowers maintenance costs.

With multi-voltage capacity, Blue e+ is versatile and ready for international use. It provides an intuitive user experience, with a simple, multi-lingual touch display and NFC-enabled interfaces.

In addition to significant energy savings, Blue e+ features:

- One standard model, one range of spare parts
- Easy, rapid assembly
- Maintenance-friendly, tool-less filter mat replacement
- Blue e+ app for smartphone interface
- International approvals and certifications
 - cULus Listed
 - EAC
 - TÜV Nord GS

IoT interface – allows devices and systems to communicate face to face.

Cooling units can be equipped with a wide range of communication technology and are playing an increasingly important role in Industry 4.0. Seamless communication between sensors inside the cooling unit and cloud-based systems is opening up opportunities for new applications. Essential to these applications are IoT-capable devices such as the new cooling units and chillers in the Rittal Blue e+ climate control product offering.

Remotely-accessed devices and predictive maintenance are based on the provision of data and networked communications. For this to happen, IoT-compatible devices equipped with the necessary communication options are required. With our Blue e+ platform and the new IoT interface, Rittal is laying the foundation for the optimal integration of cooling units and chillers in Industry 4.0 applications. This makes continuous communication from the sensor to the cloud possible, as well as connection to external monitoring or energy management systems.

Rittal's IoT interface supports; OPC-UA, Profinet, SNMP, Modbus TCP and CANopen – allowing climate control solutions to be easily integrated into IoT applications and paving the way for new applications and smart service solutions.

- With the CMC sensors and the IoT interface, temperature, humidity, access, smoke, energy and many other physical environmental parameters can be monitored.
- The system has a modular structure and can be easily adapted to the monitoring.
- Network monitoring and automation of security processes provide benefits such as improved machine availability and reduced maintenance costs.

For more information contact customer service at 800-477-4000 or email rittal@rittal.us

IoT Interface

The IoT interface is used to link Rittal components such as Blue e+ cooling units, Blue e+ chillers, smart monitoring systems etc. to the customer's own monitoring and/or energy management systems. Data may be integrated both horizontally and vertically into data collectors and processors, to allow the long-term logging and evaluation of device data, statuses and system messages.

Communication protocols:

SNMPv1, SNMPv2c, SNMPv3, OPC-UA, Modbus/ TCP, CAN bus, Profinet

Network protocols:

Telnet, SSH, FTP, SFTP, HTTP, HTTPS, NTP, DHCP, DNS, SMTP, Syslog, LDAP, RADIUS

Benefits:

– The IoT interface is middleware, whose interfaces allow a variety of devices and systems to communicate with one another. The data can then be forwarded into superordinate systems.

Material:

– Plastic to UL 94-V0

Color:

– RAL 7016 Anthracite grey

Protection category IP to IEC 60529:

– IP 20

Supply includes:

– Connection cable (1 m) with RJ 45 connector
– Angle bracket for Blue e+ cooling unit

Assembly instruction:

– The IoT interface can be secured on a 35 x 7.5 top hat rail to DIN EN 60 715 using a springloaded metal clip, or to the rear of a Blue e+ cooling unit using the angle bracket.

Model No.	3124.300
W x H x D in. (mm)	0.07 x 4.6 x 4.72 (18 x 117 x 120)
For	Blue e+ cooling units Blue e+ chillers Smart monitoring system CMC III sensors
Operating temperature range °F (°C)	+32°F...+158°F (+0°C...+70°C)
Protocols	SNMP OPC-US Modbus/TCP CAN bus Profinet
Interfaces	1 x Micro USB type B (device) for USB 2.0 1 x Micro-SD memory card slot for SD 2.0 1 x USB 2.0 high-speed functions (EHCI) 1 x acknowledgement button 1 x 3-pole push-in spring connection terminal for NTC sensor 2 x RJ45 jack for RS 485 interface (climate control unit interface)
Network interface	Ethernet IPv4/IPv6 Ethernet to IEEE 802.3 via 10BASE-T, 100BASE-T and 1000BASE-T
Type of electrical connection	3-pole push-in spring connection terminal (24 V DC)

Rittal Product Certifications and Climate Selection Tools

Rittal products meet the highest internationally recognized quality standards

All components of Rittal products are subjected to the most stringent testing in accordance with international standards and regulations. The consistently high product quality is ensured by a comprehensive quality management system. Regular product inspections by external test institutes guarantee compliance with global standards.

Rittal TopTherm Cooling Units – Guaranteed Output TÜV-tested output to DIN EN 14511

Rittal is the only supplier in the world to deliver its entire range of enclosure cooling units tested to the latest DIN EN standard. All TopTherm cooling units in the output range from 300 to 4,000 W are tested to the DIN EN 14511:2012-01 standard by the independent test institute TÜV NORD, and are authorized to carry the relevant test mark for the entire series.

This testing assures you that Rittal provides:

- Cooling units that are guaranteed to provide the cooling output you have paid for, giving you complete confidence when designing your climate control solution.
- Verified cooling outputs that are up to 10% higher than previously claimed.
- Improved Energy Efficiency Ratio (EER)
- Commitment to annual voluntary inspections

Calculators and configurators

Rittal provides calculators, configurators and apps to assist you in making the best and most informed decisions regarding your Rittal products.

Rittal Chiller Configurator

The TopTherm chiller configurator enables you to select an economically efficient solution for all your machine and process cooling needs.

<https://www.rittal.com/Configuration/Chiller/en>

Rittal Quickfinder

With the Climate Control QuickFinder, you can quickly and easily find the right air conditioning solution for your requirements. Results sent conveniently to your email.

<https://www.rittal.com/Climate-Control-QuickFinder/en/?us>

RiTherm Climate Control

Simplify the time-consuming and complicated process of calculating how much cooling your enclosure needs with this app. It also includes a rapid climate control system selection feature. Just enter temperature specs, enclosure dimensions, type of cooling solution needed and RiTherm calculates a summary of climate control equipment you'll need.

<https://www.rittal.com/therm-online/html/titellogin.php>

Fans and Filters

Ease of use for intelligent cooling

Installation is easy with the TopTherm Filter Fan: Quick-fit technology lets you snap the fan into a prepared mounting cutout, power connections are flexible for quick wiring, and spring clamp terminals make tools unnecessary for power installation. In addition, a hand-latched louvered grill improves access, and the fan motor can be reversed simply by turning the fan module.

A diagonal fan motor design provides pressure stability, for a higher and more consistent air flow, even with a filter mat. The air throughput ranges from 12 to 589 cfm (20 to 1000 m³/h) . A full range of available voltages bring cooling to any configuration. Available in wall-mount or roof-mount designs.

TopTherm Filter fans feature:

- A shallow installation depth to preserve enclosure space
- An intelligent combination of radial and axial fan technology
- Diagonal fan air flow that promotes even air distribution
- Extended filter mat service life
- UL Type 12 out of the box, UL, 3R, 4, 4X with optional hood
- Optional EMC shielding available
- Hose-proof hoods to prevent water entry

Refer to [page 18](#) for product specifications

TopTherm Air-to-Air Heat Exchanger

Cooling advantage with ambient air

In applications where filter fans may be compromised by dust or particulates, the Rittal TopTherm Air-to-Air Heat Exchanger is an efficient solution. Two separate air circuits prevent pollutants in ambient air from entering the enclosure interior. The slim design mounts to the enclosure exterior wall for maximum air flow. For ease of use, the unit is fully wired with a digital display and controller.

- Closed system support
- Digital thermostat and controller
- Fast installation on identical cut-outs for cooling units, air/air or air/water heat exchangers

Refer to [page 21](#) for product specifications

Thermoelectric Coolers

Compact cooling for your control panel and small enclosures, targeted cooling for your hot spots

Rittal's innovative design and air routing system achieves the highest refrigeration factor from the Peltier plates and fans through pulse width modulation (PWM). This eco-friendly solution provides an energy savings of 60% over conventional industry systems. The lightweight design and Peltier technology permit problem-free assembly and operation on command panels. Low vibration during use makes this system ideal for support arm systems or precision processes.

- Lightweight and powerful
- Peltier design allows cooling output of 100 W
- Low maintenance
- Scalable output either vertically or horizontally
- High operating ratio (COP >1)
- Floating change-over fault signal contact for full protection
- Large voltage range both AC and DC
- USB interface to unit programming
- RJ45 interface for linking to Rittal CMC-TC monitoring system
- Door operated switch option
- Digital enclosure internal temperature display option with memory

Refer to [page 21](#) for product specifications

TopTherm Blue e Air Conditioners

Guaranteed eco-efficiency, guaranteed output

High output combines with energy efficiency in TopTherm Blue e air conditioners. Rittal is the only supplier in the world to deliver its entire range of enclosure cooling units to the TÜV-tested DIN EN standard output. Eco-mode precision adjustment with the Comfort Controller keeps cooling rates steady. Nano-coated condenser coils and integrated condensate evaporator resist corrosion and reduce maintenance time and cost while maintaining reliable cooling capacity.

- Save up to 45% in energy consumption
- May be used with or without filter
- Multiple mounting positions
- UL Type, 12, 3R/4
- 1,000 – 15,000 BTU
- Available in carbon steel or 316 stainless steel
- Available in both wall mount and roof-mount versions

Refer to [page 22](#) for product specifications

Blue e+ Air Conditioners

Hybrid technology for maximum energy efficiency

The Blue e+ wall-mounted cooling unit pioneers new standards in cost-effectiveness and energy conservation. Hybrid climate control merges speed-regulated components with patented heat pipe technology. On average, this combination saves up to 75% in energy costs over existing cooling solutions. Blue e+ units also offer a range of powerful new features that provide longer component life, flexibility and ease of use.

- Constant temperature inside enclosure
- Active speed-governed circuit components for demand-based cooling
- Integral heat pipe for passive cooling
- Component-friendly cooling for long service life
- One standard model, one range of spare parts
- Fits standard cut-out for simple installation
- Multi-voltage capacity for international use
- Available in Carbon Steel or Stainless Steel
- Nano-coated condenser for clean reliability
- Industrial grade touchscreen for intuitive controls
- Remote monitoring via Ethernet
- For environments ranging from -4°F to 140°F
- UL Type 12 and 3R
- 6,000 – 20,000 BTU
- Available in wall mount or roof mount

Refer to [page 33](#) for product specifications

TopTherm Air-to-Water Heat Exchanger

Closed-loop cooling confidence

TopTherm exchangers offer a cost-effective, efficient and low-maintenance solution for higher ambient temperatures. Rittal Air-to-Water Heat Exchangers dissipate high heat loads, even in small, tight spaces. To facilitate a variety of installations, the liquid cooling system can be connected to an independent circuit or an entire facility system. It can be mounted using standard cut-outs for either enclosure roof or panel installation. To ensure optimal performance and longevity, the closed-loop system is sealed from contaminant penetration.

TopTherm Air-to-Water Exchangers feature:

- High-performance cooling capacity
- Output ranges from 375 to 7,000 W
- Controller-trackable temperature control, leak detection, fault signal contact
- The option to upgrade to corrosion-resistant stainless steel water transfer parts
- A digitally controlled thermostat

Refer to [page 35](#) for product specifications

Chillers: Blue e+ and TopTherm

Reliable liquid cooling units for climate control

Blue e+ chillers ensure centralized and efficient cooling of liquid media with a high level of temperature accuracy and innovative DC inverter technology. Customized waste air routing via radial fans enables flexible installation on walls and machinery. Blue e+ chillers have Standardized water connections and externally adjustable overflow valve (bypass valve) with an extensive range of system accessories

- Energy savings of up to 70%
- Intuitive operation due to touch display and intelligent interfaces
- 55% less refrigerant as a result of using microchannel technology
- Cooling capacity range 8,500 – 20,000 BTU
- Available with pre-configured option packages
- Remote Communication compatible with IoT Interface

TopTherm chillers deliver thermodynamic-efficient cooling as well as supply cooling water to air/water heat exchangers and other systems. One TopTherm chiller pipeline can cool an entire unit or a single enclosure. Both roof-mounted and standalone TopTherm chillers feature modular, compact designs.

- Small-scale footprint – only 24"
- Cooling capacity range 3,000 – 150,000 BTU
- Nano-coated condenser resists dirt buildup for an efficiency boost
- Wall-mounted chiller centralizes cooling water
- Modular design fits easily in the enclosure suite
- Integrated icing protection ensures reliable service
- One version with two frequencies provides international compatibility
- Indoor or outdoor use
- Multiple available options to customize your application

Refer to [page 37](#) for product specifications

Enclosure Heaters

Condensation protection with continual thermal output

Condensation represents a serious risk for control electronics in both indoor and outdoor locations. Rittal's enclosure heaters are designed to regulate the internal humidity and temperature of an enclosure efficiently. Their advanced positive temperature coefficient (PTC) technology allows the heater to self-regulate its operation, using energy only when required. This technology, combined with design optimization, takes advantage of the latest in computational fluid dynamics (CFD) to permit improved heating outputs. Plus, new features like double quick-connection terminals and a rapid assembly system save time and reduce unnecessary costs.

- Available with or without internal fans
- Continual thermal output of 10-150 W without fans
- Three models with built-in fans capable of generating thermal output of 250 W, 400 W and 800 W
- Models without fans operate at 110-240 volts – 50/60 Hz
- Optional thermostat, temperature indicator/controller and hygostat

Refer to [page 40](#) for product specifications

Cooling Accessories

Spare Filter Mats

Made of chopped-fiber mat with a progressive construction.

Temperature resistant to +212°F, self-extinguishing category F1 to DIN 53 438. Dust-laden air side: Open structure.

Clean air side: Closed structure.

Reliable filtering of virtually all types of dust from a particle size of 10 µm.

For filter fans	Material	H x W x D inches (mm)	Filter class to DIN EN 779	Packs of	Model No.

Outlet Filters

For ventilation by convection, an outlet filter can be installed in the upper and lower sections of the enclosure.

Material:

– ABS, material resistance to UL 94-5VA

Color:

– RAL 7035

Protection category IP to IEC 60 529:

– IP 54 incl. filter mat

Supply includes:

– Filter mat

Dimensions H x W x D inches (mm)	Model No.	
	Standard	EMC

Rittal Service

Preserve the value of your investments

Rittal supports your operations and your business. Rittal is there, every step, every day.

With a total of 63 subsidiaries, more than 250 service partners and over 1,000 service technicians worldwide, we guarantee regional proximity and fast response times. Plus, our individual maintenance contracts ensure predictable costs when service is needed.

An international presence, along with regional support, ultimate service quality and a transparent budget – this is Rittal Service.

Comprehensive service

Rittal Service offers you an extensive range of customer services from installation to individual user training. We work with you to keep your equipment, and your business, running at full speed. We deliver uptime.

On-site repairs:

- Fast expert assistance
- Qualified technicians with the right tools at the right time

Installation and commissioning:

- Installation/assembly and commissioning of individual devices or complete systems

Maintenance and spare parts:

- Preventative maintenance to safeguard the value of your equipment
- Worldwide availability of spare parts and multiple regional stocking locations
- Customer-specific spare parts inventory with service contract
- Approved, original spare parts direct from Rittal

With Rittal service, you can expect:

- A single partner source for all your needs
- Expert knowledge of all your equipment and systems
- Fast and reliable service
- Cost-effective and flexible planning

	Availability	Onsite Response	Spare parts availability	Preventative Maintenance	Warranty extension
Basic	Office hours	Not included	Standard	1x/year	Not included
Comfort	Office hours	Not included	Standard	2x/year	Not included
Advanced	24 x 365	Next day	Expedited	2x/year	Yes

Custom service offerings, including same day response, can be quoted based on availability.

Rittal Warranty

Extensions maximize profitability

Rittal products are always a good choice. In industrial environments worldwide, they demonstrate their high quality and reliability in daily operation. Regular preventative maintenance contributes to a longer product service life and thus further increases the profitability of your equipment.

Conditions for warranty extension:

- Optional warranty extension with BASIC and COMFORT service contracts
- Individual agreement on warranty extension with a CUSTOMIZED service contract
- Standard extension with ADVANCE and service contracts

Rittal Service Contracts

No additional costs for technician travel

- Spare parts supplied and installed free of charge
- Cost transparency for up to 5 years
