Paystand

Paystand: Integrated Payments for Software Platforms

BENEFITS FOR PAYSTAND CUSTOMERS

- Realize additional revenue streams
- Onboard new merchants in seconds
- Increase security and reduce risk
- Support split payments
- Frictionless payment processing
- Make ACH rails as simple as credit cards

Paystand makes it easy to send and receive payments within your software platform. With Paystand, you can set up quickly and easily, and you control the experience from end to end.

Customers use Paystand to manage the payment process in-house and improve customer onboarding. Whether you're connecting drivers with riders, property managers with tenants, or virtually any business model, let Paystand handle your payment infrastructure so you can focus on doing what you do best.

"Payments had been such a pain point from beginning to end and the team at Paystand was the polar opposite. The support on the buildout was exceptional, the team's responsiveness was excellent, and the APIs were the best we've worked with."

Paul Hoeper
CEO InvoiceASAP

Manage, Simplify, and Monetize the Payments Process

- Accept Credit Cards, Debit Cards, ACH, and Bank Login

- Earn margin from Paystand's wholesale payment rail rates

- Make bank payments as simple as credit cards, without the expensive credit card rates

- Enable split payments between multiple parties and reduce payment overhead

Improve Onboarding and Customize the Payment Experience

- Use API-Library to digitally onboard merchants in seconds

- Easily integrate your system so your customers never have to leave your software platform to receive a payment

- Control payout timing, money movement, and reporting

- Get insights from how your merchants transact with their customers

- Whitelabel the checkout, interface, and payment experience

Improve Security and Compliance While Reducing Risk

- Become a PCI DSS Level-1 certified payment processor

- Use fund-on-file tokenization to vault user payment data

Automatic Reconciliation and Ledger Management

- Attach meta-data to invoices to streamline reconciliation

- Receive automatic transfer reports and ledger updates with detailed transaction, deposit, and banking information
