

ENGAGE

Customer Success Story

Brilliant Recruiting powered by ENGAGE Talent

Lonestar Staffing Solutions is a National Staffing Company focused on finding and placing very specific job candidates in the areas of large-scale commercial and industrial construction and engineering.

The Challenge

Lone Star Staffing Solutions is hired to help find key talent in very specific areas of commercial construction, project management, mechanical, civil, electrical engineering, and power plant construction and design. This talented workforce is high in demand and extremely difficult to find and engage in a potential job change conversation. Lone Star Staffing Solutions is also challenged with a small staff to stay on top of industry trends and continue to monitor the engineering and construction industry and marketplace.

The Search

Lone Star Staffing Solutions set out to find a system that combined 4 of their recruiting & sourcing tools into one single comprehensive platform. Having multiple tools was inefficient and cost prohibitive. Lone Star Staffing Solutions was searching for one solution to help identify, engage, and communicate with job candidates for their engineering clients. In addition, Lone Star Staffing Solutions also needed to get to potential job candidates who weren't always on LinkedIn.

Immediately after seeing the ENGAGE Talent platform, the selection team knew they had found the right solution for their needs.

The Selection

"ENGAGE is easy to deploy and use. ENGAGE offers everything we need right outside of the box. It eliminates 4 different tools we previously used or looked at. It is intuitive and the customer success team is constantly there to provide concierge service and support in case we need it." - Tom Cowlshaw

ENGAGE is honored and thrilled to have such a great champion in Lone Star Staffing Solutions. Learn how you too can start building a trusting relationship with your candidates by connecting the right opportunity at the right time with the right message.

That's Brilliant Recruiting.

"ENGAGE Talent is a game changer in recruiting and sourcing.

We were impressed early on and continue to be impressed by their constant drive for innovation and for building a perfect recruiting and sourcing tool."
