Safe Air discovers better flying with Ramco!

With a complete transportation and distribution network, a leader in Third-Party Logistics(3PL) offers integrated logistics services and end-to-end supply chain solutions to clients in varied industries. Find out how they optimized their supply chain and experienced a 25 per cent reduction in delivery turnaround time using Ramco's solution.

What stood in their way

- Legacy infrastructure had multiple systems working in silos leading to inconsistent information and duplicated processes
- Lack of a system that could rapidly scale up to match the forecasted business expansion plans
- Lack of an automated process and industry standard platform, leading to high operational costs

Ramco steps into the fray

- Ramco's MRO solution provided a single integrated platform to manage Safe Air's Sale Orders, Supply Chain, and Shop Work Orders including Capacity Planning
- Ramco's Aviation Analytics was deployed to provide strategic and tactical business analytics, adding visibility to MRO Operations and Business Management
- Ramco's HR & Financial modules enabled real-time project costing, project specific parts management, critical skill set assessment and work force management

Winging the heights with Ramco

- Improved control over inventory and costs with efficient delineation of civil, military and outsourced parts
- Better insight into WIP activities and manpower utilization
- Complete audit trails and comprehensive reporting
- Seamless data flow across the various functions of the MRO
- Higher profitability through a fully integrated robust system
- End-to-end integration of Safe Air's entire ecosystem with the HR & Financial modules
