

# Digital Network Readiness Workshop

## Helping you map your journey to next generation networking.

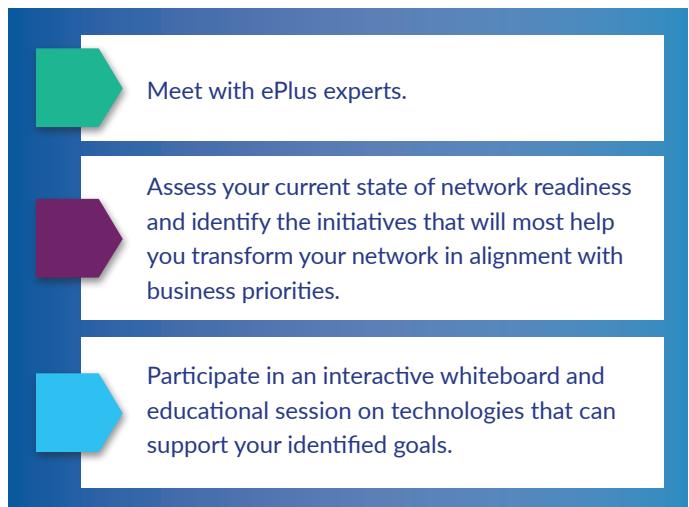

As digital business continues to grow, your network must evolve. You no longer can afford a network that is rigid and static, requiring continuous attention and a lot of manual effort to keep it running. You need a network that is automated, secure and self-driving; one that senses what your organization needs and dynamically aligns the services to meet them.

That's intent-based networking.

Where are you in this journey? We can help you find out. Better yet, we can map a path to get you where you want to go.

### How does this work?

The ePlus Digital Readiness Workshop is a 2-3 hour onsite workshop where you will:

YOUR QUESTIONS ANSWERED	A PLAN FOR YOUR NEEDS	NO COST TO YOU
Face-to-face Q&A with ePlus Cisco experts.	<p><b>A plan to implement the appropriate next steps as identified during the assessment.</b></p> <p>This includes an analysis of your existing equipment lifecycle and purchasing model options for hardware and services based on your needs.</p>	<p><b>The workshop is FREE!</b></p> <p>Give us your time and attention, and we'll do the rest!</p>

After the workshop, our team will analyze your data. We will prepare a customized plan based on your goals and present our recommendations along with next steps.

### SCHEDULE TODAY!

To learn more about Digital Readiness and schedule your workshop, contact your local ePlus Account Executive today.
