

Detection Technologies Announces Agreement with Major U.S. Compressor Leasing Company

February 8, 2012

Calgary, Alberta and Houston, Texas

Detection Technologies, leaders in compression optimization and management, announced today that it will be providing its compressor optimization and fleet management services to a significant natural gas compressor leasing company in the United States.

“We are excited about this partnership, which brings the significant benefits of Detection’s compressor fleet management and optimization directly to a major leasing company,” said Brian Taylor, Detection’s President and CEO. “As a leasing company, our client provides turnkey compression services. They will be using our proven ability to help them improve their fleet reliability and overall compressor utilization, which will translate into improved financial performance as they are able to provide reliable service to their customers.”

Enalysis™ is Detection’s web-accessible online platform that provides compressor fleet management and optimization, as well as knowledge capture across the fleet. Beyond the powerful optimization software, Detection provides each client continuous access to an Engineering Account Manager, who monitors the customer’s fleet and provides valuable recommendations to improve efficiency and reliability.

Detection Technologies is the developer of Enalysis™, the world’s leading compressor optimization, simulation, and fleet management program. Detection also offers its world-class compressor school courses across North America. For more information on Detection, please call 1.800.780.9798, or visit their website at www.detection.com.
