

SECURE DESTRUCTION

When it comes to managing sensitive, proprietary and confidential waste in a safe and environmentally sustainable manner, Dublin Waste to Energy is the expert. Minimising risk and eliminating long-term liability is our business. Providing peace of mind and the security of 100% thermal destruction is our promise.

SECURITY

Complete material destruction at temperatures over 850°C

End-to-end service, with witnessed and certified destruction options

Strict compliance with EU, EPA and other regulatory agency standards

CAPABILITY

Non-hazardous special waste that requires thermal treatment

Consumer packaged products identified as not to be sold, including off-spec products, damaged and expired goods

Sensitive and classified materials which include documents, SIM or smart cards

Prototypes, research and development materials, retained samples, illegal products and counterfeits

Pharmaceutical production waste, sludge and finished packaged goods

SUSTAINABILITY

Clean power generation through Waste to Energy technology

Land conservation and prevention of soil and waterway contamination

Greenhouse gas diversion
