DESCRIPTION

The Nova 596 Series Ethylene (C_2H_4) alarm monitors are designed for the continuous detection of C_2H_4 in ambient air. The ethylene sensor is of the disposable electrochemical type with an expected life of between 3-4 years. The sensor needs no warm up time and is ready to go as soon as the monitor is turned on.

MODELS

- 596D one diffusion-type sensor in main cabinet
- 596DR1 one diffusion sensor remote from main cabinet
- · 596DR2 two remote diffusion sensors
- 596DR3 three remote diffusion sensors
- 596DR4 four remote diffusion sensors

 596P - built-in sample pump to draw in sample from another location
