SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

Product #: VAS-ADRIVE (aDrive Service)

aDrive is an automated online backup solution for desktop computer users. It makes it easy to automatically backup your files in a secure storage environment and easily retrieve stored data.

Simple, Wizard-based installation: It takes less than 5 minutes to begin protecting information. The user easily sets up backup times and settings just once and the rest is up to us.

Automatic Backups: Once set, data backups are done automatically. Even if the user is offline at the designated time, our system remembers to backup whenever an Internet connection is re-established.

Fast, Easy Data Recovery: Users quickly restore their own files with our easy retrieval system, putting them in control. Files are restored to their original format, settings and location.

Web Access: Our internet-based system allows files to be available anytime, anywhere that you have Internet access. Users can even leave their laptop at home and not lose a second of productivity.

Strong Factor Authentication: **aDrive** provides the option to go beyond simple password authentication to ensure that only those authorized have access to their information.

Encryption: Data can be transmitted in an encrypted form (SSL or Triple-DES), preventing interception by an unauthorized person.

Firewall: Backed up information is protected behind a cutting-edge firewall technology and managed by a dedicated security monitoring team.

Privacy Assurance: Strict internal controls and policies ensure that data is secure and accessible only by those authorized. The NSA-developed "Triple-DES" option provides an additional level of protection.

Redundant Data Storage: Each file stored is copied on Telco-grade disk drive systems and double backed up to tape, making data loss virtually impossible.
