

How We Engage**Agorai Delivers**

Bespoke application development requires extended timeframes for requirements definition, with the cost of change rising dramatically in later phases. Using Agile methods or package solutions adds only so much efficiency. Using AI-enabled products with the right data assets changes the delivery paradigm.

AI solutions are paving the way for businesses to drastically reduce go-to-market times, as well as reduce the cost of implementation. Our team of experts have experience delivering AI solutions, as well as leading enterprise transformation programs at some of the largest firms on the planet. We are highly skilled at working with internal teams and partners to align delivery efforts to achieve overall success for your business.

**AI Transformation Strategy**

Agorai applies world-class expertise to help you understand how to leverage AI as a strategic asset. Our approach holistically assesses impact to people, processes, and customer experience and is designed to align with and complement existing business transformation efforts.

**AI Product Selection & Implementation**

We make selecting and implementing AI solutions simple. We are constantly scouring the market for the best solutions available and provide you with a curated suite of applications based on your specific needs. Agorai also provides full delivery capabilities to meet your needs – whether that be program management or fully owning the deployment of a product.

**Bespoke AI Solutions**

Some AI solutions may require development of new models, modifications of existing functionality, or intensive exercises to structure data appropriately. Agorai provides the expertise required to help you get the best leverage from AI for the unique needs of your business without incurring the costs of a full, in-house team.
