

Agorai is a new breed of company. We are an AI and data enablement firm.

We guide companies that are seeking to join the AI economy. Implementing artificial intelligence solutions can be complicated and determining how to get started even more so. We work with you to make it simple. Here is what we do:

We continuously **curate** applied AI solutions that are available today.

We **connect** you with the solutions that can address your specific business needs.

We help you **deliver** these solutions quickly to realize value faster.

Making Financial Services Better with Artificial Intelligence – Representative Offerings**Fraud Detection**

We provide supercharged fraud detection technology. Our cloud-based, machine learning-enabled platform enriches and analyzes data points at multiple transaction points and delivers clear precision scoring of activity, allowing businesses to focus on fraud remediation vs. fraud identification.

**Back Office Automation and Optimization**

Our solutions automate many of the manual tasks associated with financial services middle and back office operations including data reconciliation, data anomaly detection and analysis regulatory compliance, and enterprise reporting. Used by some of the world's largest banks, we have delivered significant reductions in cost and enterprise risk while improving efficiency.

**Revenue Generating Insights**

We provide businesses with close to real-time data from over one billion mobile devices, which when combined with the right machine learning models and in-house data sets creates a competitive advantage for creating portfolio strategies, trading, and lending.

Our Expertise**AI Expertise**

Agorai benefits from having leading AI scientists from universities such as MIT and Imperial College in-house. We also work closely with the top VC funds, corporates, and investment funds focused on investing in applied AI solutions and data assets in the financial services space.

Financial Services Expertise

Our financial services leads have run trading desks, managed back office operations, and run enterprise IT programs. We have the right “in-the-trenches” experience to partner effectively and ensure your success in a highly regulated environment.

How We Engage**Agorai Delivers**

Bespoke application development requires extended timeframes for requirements definition, with the cost of change rising dramatically in later phases. Using Agile methods or package solutions adds only so much efficiency. Using AI-enabled products with the right data assets changes the delivery paradigm.

AI solutions are paving the way for businesses to drastically reduce go-to-market times, as well as reduce the cost of implementation. Our team of experts have experience delivering AI solutions, as well as leading enterprise transformation programs at some of the largest firms on the planet. We are highly skilled at working with internal teams and partners to align delivery efforts to achieve overall success for your business.

**AI Transformation Strategy**

Agorai applies world-class expertise to help you understand how to leverage AI as a strategic asset. Our approach holistically assesses impact to people, processes, and customer experience and is designed to align with and complement existing business transformation efforts.

**AI Product Selection & Implementation**

We make selecting and implementing AI solutions simple. We are constantly scouring the market for the best solutions available and provide you with a curated suite of applications based on your specific needs. Agorai also provides full delivery capabilities to meet your needs – whether that be program management or fully owning the deployment of a product.

**Bespoke AI Solutions**

Some AI solutions may require development of new models, modifications of existing functionality, or intensive exercises to structure data appropriately. Agorai provides the expertise required to help you get the best leverage from AI for the unique needs of your business without incurring the costs of a full, in-house team.
