OK Cancel

Install Remote Run the setup.exe program and click next 3 times until you have a window that asks you to Select Additional Tasks. Make sure you have 'Create a desktop icon,' and 'Microsoft .Net Framework 4 (Web Installer)' selected. Select 'Apply patch for 64-bit Windows' if needed according to the system type. Select Next and Install.

You do not need to restart when it is finished installing.

Opening Remote Open software by clicking on the icon located on your desktop. Click Connect on the right side of window. On Comm Manager window, click Add, Enter store description, enter DVR IP Address; Click Save.

Select location and click Connect. Type in the username and password you use on the DVR system at the store and click OK. You should see camera #1.
