

Approved Modem List

Below is a list of approved modems that are compatible with the Ritter Communications network. Keep in mind, if you buy your own modem from an outside vendor and do not use one of our modems, the modem you supply will not be supported if you have any issues with it. When you use a Ritter Communications provided modem, your equipment is protected in case the modem stops working properly. If needed, we will even send a tech to connect your Ritter Communications modem so you do not have to be inconvenienced or worry about setting it up correctly. We do not offer tech support for non-Ritter modems.

Cable Modem (CATV/HFC)
