

AUTOMOTIVE MARKET

CGR Products is a converter of materials used across the automotive market. From engine gaskets, trim, interior, and exterior parts, CGR is a resource for automotive tier suppliers and original equipment manufacturers (OEM) as well as aftermarket suppliers. High-temperature applications, bonding solutions, and HVAC applications are just part of our automotive offerings:

1. Engine assembly gaskets, such as intake, carburetor, manifold, transmission, and oil pan gaskets using a variety of beater ad materials, graphite/steel, and non-asbestos sheet.
2. Bump, rattle, and squeak applications.
3. Insulation requirements using polyester, urethanes, felt, and shoddy for sound absorption.
4. Low VOC adhesives for interior applications.
5. Die cut 3M Dual Lock Fastening Materials for interior attachment applications.
6. Die cut foam strips with adhesive for use in dust barriers and seals.
7. Die cut rubber shapes used for trunk latch gaskets, gap fillers, interior trim sponge, and blocks for vibration and sound attenuation.
8. Die cut parts from rubber or sponge materials such as PORON for use in cup holder applications and console bin mats.
9. Cushion and anti-rattle materials for exterior mirrors.
10. Exterior trim die cuts including custom cut tapes for nameplate/logo placement, side panel trim, and molding.
11. Pressure Relief Valves (PRVs) or air extractors using a thin-gauge EPDM to release air from the interior cabin.
12. High temperature applications including exhaust barrier gaskets, insulation, and fire retardant baffling.
