Administrative Alert! Changes to Indexed Life Portfolio

Due to the continuing economic impact of the COVID-19 pandemic, it is necessary to reduce cap rates on some of the accounts within our Indexed Universal Life product portfolio.

These changes will take effect for all premium received and new indexed segments created after Friday, June 19, 2020. All premium received on or before June 19 for approved and existing policies will have current rates applied. Illustrations will be updated June 20, 2020.

Many considerations go into determining the cap and participation rates – and we want to make sure you understand how they are determined and why they change.
