

3-GIS

The future is software defined

Where the physical network and services must be delivered faster, 3-GIS is pioneering a single database approach based on geospatial reference, rules-based engine, mobility, and web-based services that is revolutionizing the potential to realize market opportunities of fiber assets.

3-GIS was founded to deliver technology and expertise that not only address customers fiber management problems, but enables innovation and improvements in their operational processes and business transformation. We continue to build solutions that make fiber networks easier to plan, build, and manage.

Why 3-GIS

To meet the new demands for increasingly complex networks, the core capabilities that have been the hallmark of 3-GIS will continue to drive our efforts in delivering solutions that improve the economics and sustainability of our customers' assets.

Our customers

- > Network service providers
- > Network engineering firms
- > Utility companies
- > Campuses
- > Private network operators
- > Municipalities and coops

Founded: 2006

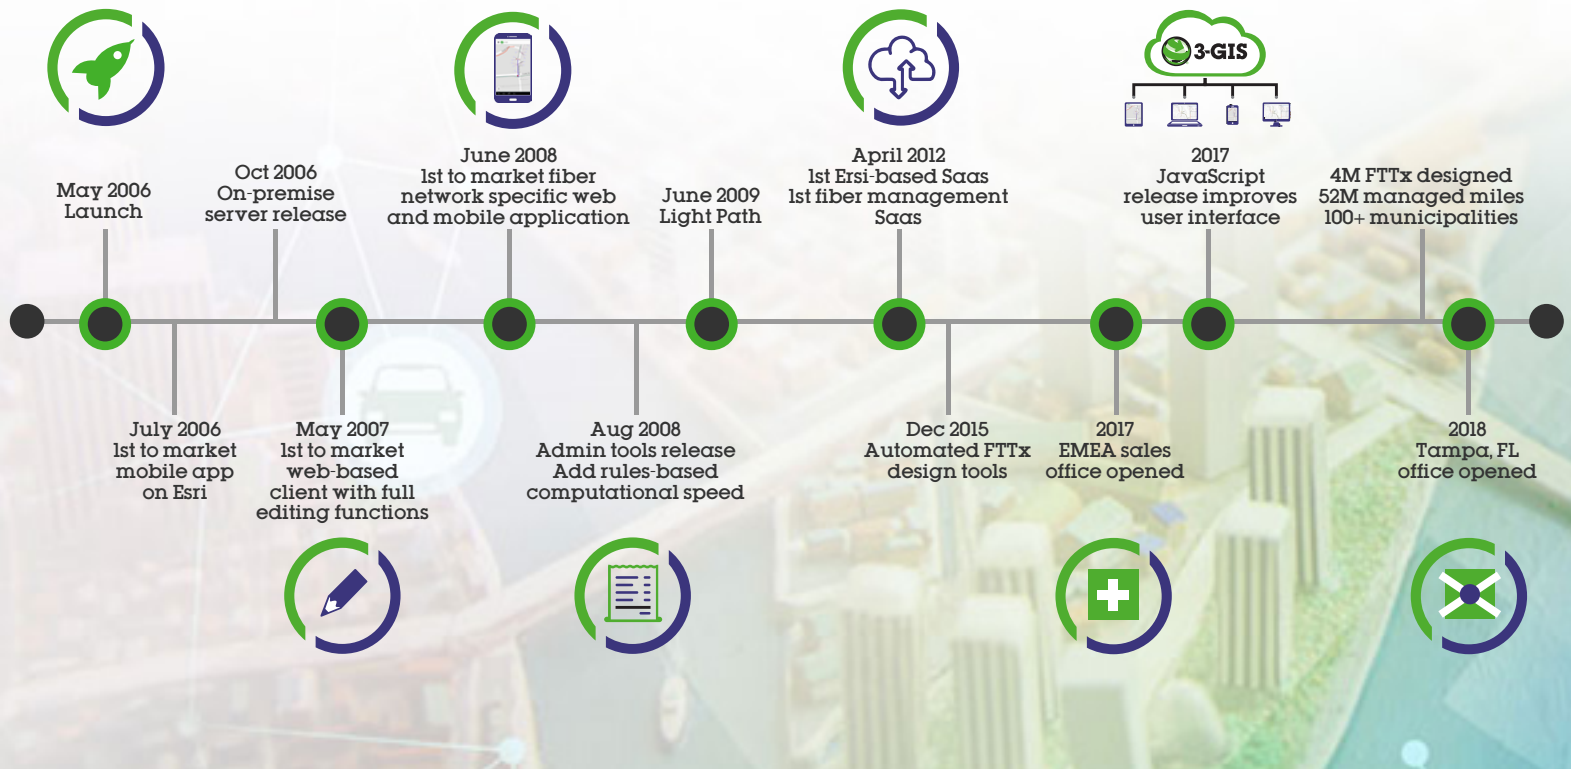

Headquarters:
Decatur, AL USA

EMEA office:
Bern, Switzerland

 www.3-GIS.com

3-GIS | Web

Model not only where network assets are located, but also understand the way those assets work together and interact with one another to bring service to the end customer.

3-GIS | Mobile

Improve the efficiencies of critical rideouts by putting network data directly in the hands of work crews.

3-GIS | Prospector

Bring the speed of an automatic routing engine to create least-cost routes in minutes.

3-GIS | Civil Engine

Apply user-defined architectural rules to design the network that meets the business needs.

Augmented Design Services

Put experts and 3-GIS applications into practice to help win and deliver new projects.

Our products

As makers of the industry's first SaaS network asset solution, setting the performance standard for fiber management is second nature for us.

Now, we are helping bring such performance standards to network design and deployment automation.
