

Conavi Medical nGen Pitch Day

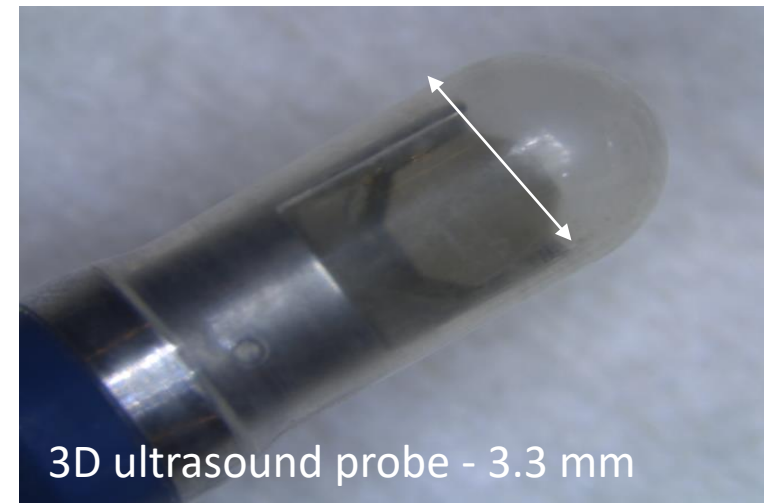

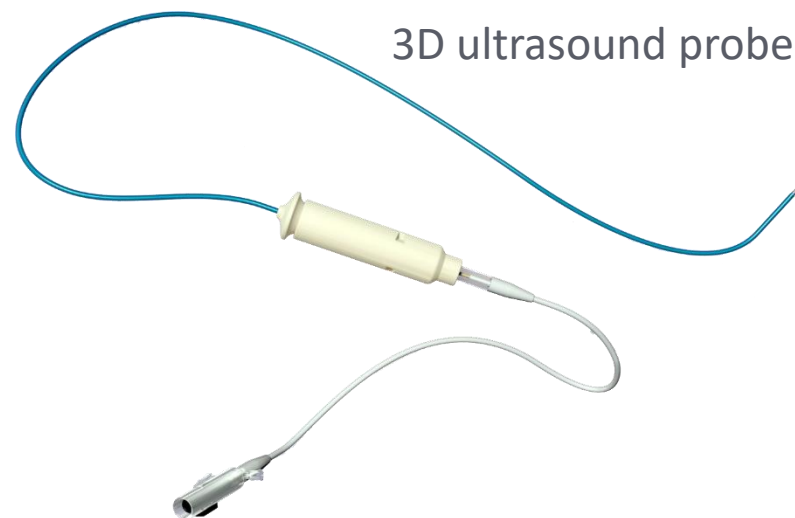

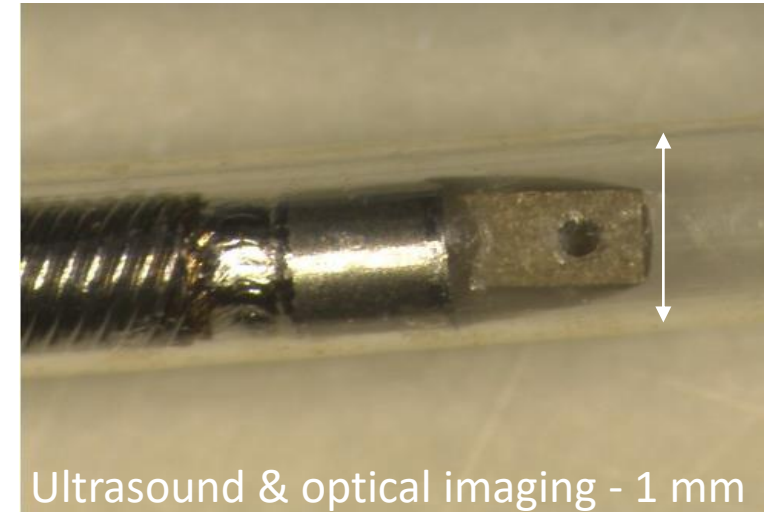

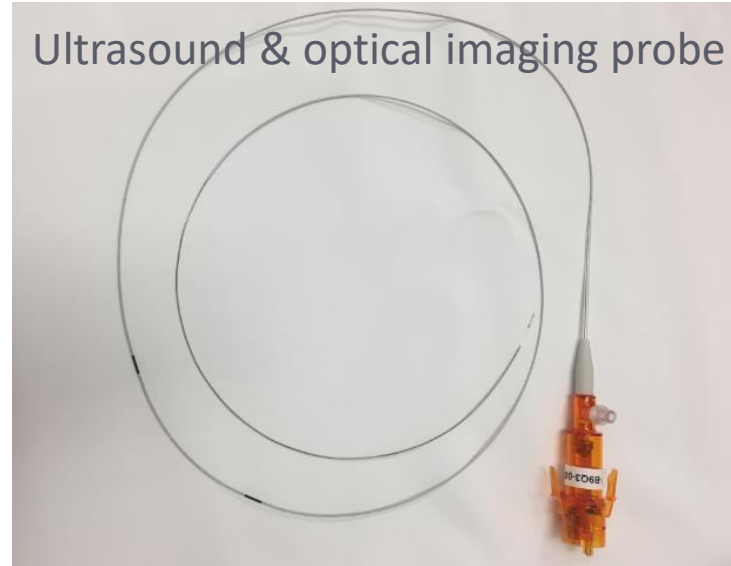

Presented by Stefano Picone
Director of Finance
April 16, 2019

Company overview

- ◇ Commercial-stage medical device company
- ◇ Develop technologies to image the heart during procedures
- ◇ Two products, both with FDA clearance and Health Canada approval
- ◇ Distribution agreements in Japan and China
- ◇ Founded in 2007, received \$50 mil USD+ of investment to date
- ◇ 52 issued patents, 65+ applications pending
- ◇ 84 employees including 34 manufacturing and 28 R&D staff
- ◇ 20,000 square foot facility in Toronto (401 & Leslie), ISO 13485:2016 certified
- ◇ Manufacture in-house

Technology overview

Opportunities for collaboration

- ◇ Automation of micro-assembling
 - > Assembly of imaging cores
 - > Application and curing of epoxies with high repeatability and precision film thickness
 - > Incoming and in-process automated inspection systems
 - > Micro-precision welding
 - > Additive manufacturing of 3D non-planar miniaturized components
- ◇ Automation of testing of micro-assembled parts
- ◇ Development of assembly and testing jigs and systems
- ◇ Development of validation of assemblies with high degree of traceability
- ◇ Catheter sheath extrusion, coating and assembly
 - > Currently a very labour intensive process
