Company overview

Benchwork is a collaborative supply chain platform that streamlines the complex garment and accessories manufacturing process.

We pair brands with vetted ethical manufacturers and reduce the back-and-forth enabling them to go from sketch to final product faster than ever before.

PROJECT DESCRIPTION:

Benchmark is a platform that allows brands and manufacturers to better manage their supply chain. We are now looking to adapt our platform to help manufacturers in the apparel and accessories industry.

PROJECT
DURATION:
12 months

STARTING
MRL LEVEL:

PROJECT OBJECTIVES:

- Automate cost sheets from tech packs for easier, faster quoting and to offset upfront admin costs to take on a new client or grow with your current clientele
- Make customer collaboration easier for apparel and accessory manufacturers
- To keep Canadian factories competitive with their overseas competition by enabling them to provide unbeatable speed and service for a fraction of the cost
- Maximize line efficiency and organize production with better planning tools

ENDING
MRL LEVEL:

OUR EXPERTISE AND ROLE IN THE PROJECT:

- Established relationships with 5 Canadian jewellery designers
- Established relationship with 1 Canadian apparel manufacturer
- Developed platform with active users

EXPERTISE WE ARE SEEKING:

- Garment or accessories manufacturer looking to lower their costs
- And/or: Capability to implement a technology solution to maximize their production line
- And/or: a partner with a deep understanding of the garment or accessories production lifecycle
