email: alex@racerinternational.com Tel: 519-623-6223 x201

- RACER is a proud Canadian manufacturer of Advanced Precision Machining Tool Technologies
- RACER manufactures precision lathes and mills both manual and CNC, at the heart of diverse manufacturing environments
- RACER solutions create other automation equipment & machines, cars and trucks, aerospace, space and defence components +
- Environmental and health innovation – eliminating particulates, fluids
- RACER is looking to bring new additive manufacturing processes to its material removal product line for next-gen precision manufacturing.

- Our capabilities in Advanced Manufacturing:
 - Precision Machine manufacturing
 - Engineering and Design
 - Research and Development
 - Intellectual Property (Patents, Trademarks)

Images not to scale

• Partnerships we are seeking:

- Research assistance
 - *Materials*
 - *Cutting technology*
 - *Additive technology*
- Field trials and testing
- Software/hardware development for next-gen additive process optimization
- Industrial and Technological Benefits / Value Proposition recipient
 - *SME, capacity building, export/supply chain, R&D consortiums, etc.*

• Our customers:
