

Amber Molecular Inc

Trevor Plint, Cofounder, trevor@ambermolecular.ca

- 4 person advanced materials startup headquartered in Toronto
- **“We make chemicals that light up red in smartphone displays”**
- Smartphone manufacturers buy special chemicals to make coloured pixels
- High value fine chemicals
 - \$3000-\$5000/g
 - \$890M/y market in 2022 (43% CAGR)
- **Problem: current chemicals are obsolete!**

- We enable OLEDs which meet upcoming BT.2020 standards
- Approached by leading OLED display and technology companies
 - **“No-one is making good deep red emitters!”**

- **We are looking to share this opportunity with:**
 - Strategic partners and investors
 - Fine chemical manufacturers
- Investors have put over \$40M into two next generation OLED startups
- Former startup Novald sold for \$350M in 2013

- **Amber Molecular has a massive opportunity**
 - OLED market is growing explosively
 - New standards are driving innovation
 - Current red emitters are obsolete
 - We have a 13 year head start
