Mi-Co Mobility Summit - 2015

Jeff Rogers – Environmental Program Planner Doug Edwards – Project Technician

Virginia Department of Agriculture & Consumer Services * Office of Pesticide Services

Office of Pesticide Services (OPS)

The OPS Mission

- Protect consumers and the environment;
- Ensure the safe and effective control of pests that adversely affect crops, structures, health, and domestic animals.
- OPS authority
 - Virginia Pesticide Control Act and
 - Regulations Pursuant to the Act.
- Staff also has federal credentials to enforce provisions of the Federal Insecticide, Fungicide and Rodenticide Act.

Office of Pesticide Services

A bit about the process...

- Eforms solution funded by US EPA Region III
- Solution to be developed first in Virginia
- Then proliferated to the other EPA Region III states.
- Beginning implementation in West Virginia and Maryland

Why MiForms?

As of July 15, 2014 (CLRT statistics)

- certified applicators 21,545
 - 7,519 commercial
 - 6,724 private
 - 7,302 registered technicians)
- licensed pesticide businesses 2,897
- pesticide products registered 14,954

(That's about 40,000 pieces of paper...)

Why MiForms? – Enforcement

For July 1, 2013 through June 30, 2014

- Conducted 2,167 inspections
- Conducted 121 investigations
- Responded to 25 citizen assistance requests
- Reviewed and approved 334 pesticide safety education programs (recertification courses)
- Participated/conducted 176 outreach and education events
- Monitored 79 pesticide safety education programs (recertification courses)

Why MiForms ?

- Successful Implementation for North Carolina
- Cost efficiency
- Product Quality
- Form flexibility
- Availability of data
 - For field staff
 - For administrative staff
- User control

Cost Efficiency

- Savings in printing and mailingForms completed in less time
 - In a regulatory organization ~ 80% of the budget is taken up by personnel costs.

Great Data – Poor Penmanship...

Product Quality

- All inspection results are public record
- MiForms solution creates standardized output that is always neat and legible
- Required fields always completed

Form Flexibility

- Forms can be changed quickly.
- No need to wait for the next revision and printing cycle.
- No need to hand written addendums
- Able to respond to the 'focus de jour'

Data Availability

For field staff

- Lookup tables built into the form for all applicators, businesses and products
- Maintains consistency of names, addresses, etc between inspections
- For Admin Staff
 - Immediacy of availability of inspection activities and results for timely analyses

User Control

- Using the designer the user can...
 - Make changes to the forms
 - Develop new forms

The Virginia Solution

The Form Package

- Every inspection involves multiple forms issued to the same individual/business
- That group of forms constitutes a 'case'
- The Master Form contains basic ID information on the primary inspected party
 - All forms are sub-forms of the master
 - Auto-populated from the master

The Master Form

The Virginia Solution

- Data Replication
 - Daily creation of csv files from the CLRT data for
 - Businesses
 - Applicators
 - Products
 - Inspectors
 - Data replication process melds that data into an sqlite database on the MiForms server
 - Staff use the Data Sync Form to download the changes into an sqlite database on their client machine

Reporting and analysis tool

Challenges

- Staff acceptance
 - Generally positive
 - Practice, practice, practice...
 - Don't presuppose who will like or dislike.
 - Be flexible in allowing how forms are completed

Challenges - Staff

- What they like
 - DATA!
 - Pre-fill of sessions prior to inspection
 - Quality of the output
 - Email of results to inspected party
 - No more mailing of inspections

Challenges - Staff

- Sources of frustration
 - Failed uploads/downloads
 - Styli that work intermittently
 - Tablet batteries keeping them charged
 - Screen visibility in daylight
- Solutions for these items???
 - Think through your hardware choices carefully
 - Spare styli and batteries
 - Second docking stations for mounting in trucks
 - Can use touch in place of pen input (mostly)

Challenges - Technical

- BANDWIDTH, BANDWIDTH, BANDWIDTH
 - Master form concept very helpful, but it's a big chunk of data...
 - Lookup data rather large
- Solutions...
 - 10.1 has improved compression and has helped greatly with success in uploading sessions
 - Make sure staff have access to GOOD internet connections

Mi-Co Mobility Summit - 2015
