and Compliance

### Problems

- Paper forms or Excel sheets are cumbersome and slow down on-site data capture and reporting
- Data errors due to outdated processing and limited capture options
- Slow reporting and manual analysis of data
- Loss of time and productivity of field personnel, management and office staff
- No insight into workforce efficiency or historical data

### Solutions

- Mobile data capture reduces time for each field inspection and is easy to do
- Supports any data type you need — text, checkboxes, radio buttons, photos, GPS, barcodes, RFID, speech, handwriting and more
- Easily export to multiple document formats including Word, Excel and PDF; Fully-Customizable dashboards allow administrators to set up custom views of data
- Real-time data reporting and monitoring of workforce efficiency

# Turn Our Solutions Into Your Success

Rapidly deploy secure inspection apps that work seamlessly with your enterprise system and ignite your team's success.

## Mobile Impact (*Mi*) Platform Capabilities

### *Mi*-Inspections

The most intuitive data capture workflow technology available on the market to speed up and simplify all your work from the field to the office to the customer.

- Field inspectors gain more time in the day due to mobile capture and prefill form capabilities even while offline
- Teams increase number of inspections per hour, driving results to the bottom line
- Management receives immediate and meaningful analysis of results and team performance
- Enterprise class scaling ensures security and manageability

### *Mi*-Analytics

A highly customizable reporting dashboard for business executives that integrates data from mobile systems or other databases. Understanding your data just got a whole lot easier.

- Provides real-time insight into company operations through Mi-Platform or other enterprise resources
- Discern patterns and make better business decisions for healthy operations
- Monitor field personnel in real-time to increase productivity
- Reports for inspections, timesheets, and trend analysis increase ROI

### *Mi*-Platform

A comprehensive toolkit for building secure mobile forms and applications that handles 100% of your mobile data collection needs.

- Intuitive, user-friendly platform for today's mobile workforce
- Routing and approval for mobile forms, seamless integration, complete security, with offline syncing and data replication
- Modern, scalable, robust technology that grows with your organization
- Fully customizable for your needs and support across platforms, along with immediate data availability to multiple document formats
