

# About VAR Resources

## Technology Leasing and Financing Specialists

### Expertise

VAR Resources has the financial expertise to provide your business with the leasing options that you need. Our Account Managers have the knowledge to provide you with competitive pricing, a variety of lease options and the tools to strategically take your business to the next level.

Because VAR Resources is solely an IT lease and finance company, our financial expertise can help you manage the lowest total cost of ownership while still providing you with the technology you need.

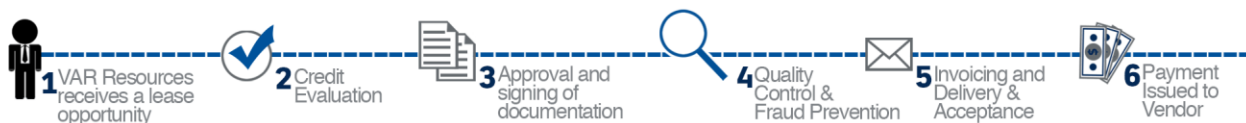

### Experience

For 25 years, VAR Resources has developed an unmatched expertise in the IT industry. Our experience in technology gives us the ability to provide you with competitive pricing, a fast turnaround time and the highest approval percentage in the industry.

### Creative Solutions

No two businesses are alike. Each one has individual challenges, specific needs and different budgets. VAR Resources understands the need for customized solutions and we are able to create innovative leasing opportunities for you. We can also create a flexible financing package that uses terms and payment structures based on your specific needs.

### Premier Customer Service

You are not simply a customer at VAR Resources; you are a valuable investment. Our Account Managers are able to give you assistance throughout the entire financing process. With your decision to lease or finance new technology, we want to ensure that your business will grow and continue to be successful. We are also able to structure leases so that you are easily able to add and upgrade your equipment.
