

## State & Local Agencies Choose Mi-Forms

Mi-Forms provides flexible and powerful mobile GIS field inspection process automation capability. Mi-Forms mobile data collection solutions transform field and site inspection processes, providing strong efficiency and effectiveness benefits and improving availability of critical data for reporting and GIS analysis. Mi-Forms allows enterprise customers to optimize field inspection data collection processes with powerful and user-friendly electronic data capture, real-time data validation, workflow and secure communication to critical systems.

### Mi-Forms features include:

**Any Device:** Mi-Forms makes your GIS available with the devices you want to use; iPads, Android tablets, and Microsoft Windows devices, PCs, Anoto Digital Pens with paper, Virtual & On-premise Servers, laptops, Workstations.

**Online and offline:** Unlike Web-only solutions, Mi-Forms works in remote field situations when a hot-spot is not available.

**GIS Workflow & Audit Trails:** An enterprise-class administrative server for central management of users, forms & data flows, version control, audit trails and routing workflows.

*"Using Mi-Forms Mobile-Forms software on Tablets, we now operate with a much more streamlined process, and are able to generate better revenue streams as a result of readily available registration and license information."*

## Mi-Forms for Mobile GIS Field Service

**Touch Friendly:** Mobile friendly checkboxes, drop down lists, toggles, switches and text field customization (dates, masks, validation) to make collection easy and reduce mistakes.

**Speech Recognition & Capture:** Hands-free e-Forms, speak naturally and SayIt™ voice recognition & capture will fill in the fields for you.

**Handwriting Interpretation:** Write with a digital pen or your fingertip, and Mi-Forms will interpret your handwriting. An easy way to collect signatures and GIS field notes.

**Photo Capture and Inking:** Add photos with mark-up and notes. Mi-Forms can even prompt the user for photo capture with workflow rules.

**Barcode Scanning, GPS Tracking and RFID:** Rich data capture comes standard and is easy to add to any template.

**Your Business Rules:** Business rules may be added to a form to enforce quality data collection. Such rules avoid missing data, flag potential errors or submission of bad data vastly boosting accuracy.

**Intelligent Feedback:** The form designer can specify real-time feedback during data collection. The feedback may occur when data is entered, calculations are performed or when business rules are violated.

**Flexible integrations:** Send data directly to your line of business applications, databases, document management systems,

GIS and more — using web-services, flat-file exchange, APIs, SDKs and many other methods. ESRI and Google Earth.

**Public Facing Forms:** For citizens to complete, anonymously on HTML5 web browsers so agencies can collect critical information from their constituents and route them into Mi-Forms workflows and into databases for quick reporting.

*"One Government agency has already demonstrated a 60% reduction in data collection time using the Mi-Forms System."*
