

## Become a Mi-Forms Champion

With over 15 years of experience implementing Mi-Forms mobile forms solutions, Mi-Corporation (Mi-Co) has worked with a number of champions at customer organizations that have played key roles in enabling their Mi-Forms projects to get approved and launched.

**Such organizations have experienced benefits, including:**

In addition to the benefits these champions have helped their companies experience, these individuals have also realized benefits both personally and professionally.

- (Hospital) The Cardiovascular Information Systems Manager was **promoted to Director of Data Integration** following their highly successful Mi-Forms project
- (State Gov. Agency) The Mi-Forms champion was recognized as “**Employee of the Month**”
- (Clinical Trials) The Data Configuration Specialist was **promoted to Mobile Technology Specialist** and enabled their organization to **win nationwide recognition and awards**

In each of these cases among others, these champions have played a key role in helping their organizations justify the need for the efficiencies, productivity and cost savings that our Mi-Forms technology would bring them. They each assisted in getting these projects approved through the correct funnels and launched in a timely fashion—even in cases when the project was not a planned initiative for the year.

The success stories outlined above show the rich professional and personal benefits that Mi-Forms champions can achieve, in addition to making a huge difference within their organizations. We look forward to your support as a Mi-Forms Champion and to helping you bring similar success to your organization.
