

# FUND UPDATE

## kōura KiwiSaver Scheme : Rest Of World Equities Fund

Fund Update for the quarter ended 31 December 2019

This update was first made publicly available on 13 February 2020

### What is the purpose of this update?

This document tells you how the Kōura Wealth KiwiSaver Rest of World Equities Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Kōura Wealth Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated

### Description of this fund

This Fund provides exposure to the share markets of Europe, Australasia, Singapore, Hong Kong, Japan and Israel. The Fund will invest in underlying funds to provide this desired exposure. The Fund expects to deliver a negative return once in every 3–4 years

Total value of the fund (\$)	\$677,975
Number of investors in the fund	81
The date the fund started	23 October 2019

### What are the risks of investing?

Risk indicator for the Rest of World Equities Fund<sup>1</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/guides/kiwisaver-which-fund-suits>

Note that even the lowest category does not mean a risk-free investment, and there may be other risks that are not captured by this rating

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years ended 31 December 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Past Year
Annual Return (After deductions for charges and Tax)	Not Applicable <sup>2</sup>
Annual Return (After deductions for charges but before Tax)	Not Applicable <sup>2</sup>
Market index annual return (Reflects no deduction for charges and tax)	23.22%

The Market index for this fund is the Morningstar Developed Markets ex North America GR (30% Converted to NZ Dollars and 70% Hedged to NZ Dollars).

## What fees are investors charged?

Investors in the Rest of World Fund are charged fund charges. Based on the PDS dated 27 September 2019, these are expected to be:

	% of net asset value
<b>Total Fund charges</b>	<b>0.63%</b>
Which are made up of:	
<b>Total Management and administration charges</b>	<b>0.63%</b>
Including:	
Manager's basic fee	0.43%
Other Management and administration fees	0.20%
<b>Total performance based fees</b>	<b>0.00%</b>
<b>Other charges</b>	Dollar amount per investor
<b>Administration Fee</b>	<b>\$30 per year</b>

All fund charges are exclusive of GST.

Investors are not charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds).

## Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Lily had \$10,000 in the fund at its inception (23 October 2019) and did not make any further contributions. At the end of the period (31 December 2019), Lily received a return after fund charges were deducted of \$81 (That is 0.81% of her initial \$10,000). Lily also paid \$5.00 in other charges. This gives Lily a total return after tax of \$76 for the period.

## What does the fund invest in?

This shows the types of assets that the fund invests in.

### Actual investment mix

### Target investment mix

Cash and cash equivalents	1%	International equities	99%
New Zealand fixed interest	0%	Australasian equities	0%

## Notes

1. As the fund started on 23 October 2019, actual returns for the fund are not available until then. To calculate the risk indicator for the five-year period ending 31 December 2019, market index returns have been used up to 31 October 2019 with actual fund returns used for the balance of the period. As a result of those market returns, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. As the fund started on 23 October 2019, actual returns for the fund are not available.
