Automatic Strapping Machine for Small Packages

AUTOMATIC STRAPPING FOR SMALL PACKAGES

The SQ-800S with brushless DC motor for small packages boasts all the advanced features of the SQ-800 such as self-loading, refeed and loop ejection.

■ Small Package Capabilities

Ideal for strapping small bundles of plastic pipes, steel rods, aluminum sashes, etc. SQ-800S tightly straps packages as small as W40 x H30mm (W1-1/2 x H1-1/8 in) *

■ Strapping Speed

Standard strapping rate is 54 straps/min, even with tension applied. The machine is ready to operate in less than 25 seconds, contributing to increased packaging line efficiencies.

■ Less Dusting and Less Moving Parts with Self-Lubricating Design

The upgraded sealing head utilizing DC motors means less moving parts and less dusting from plastic strapping. It also reduces the maintenance cost. Strapack's signature self-lubricating design also reduces wear and tear, makes the maintenance easier, and increase operational life of the machine.

■ Optional Features

- Adjustable Table height for easy integration in packaging lines
- Foot Bar Switch for hands-dree operation
- Cycle Counter
