Xpress Conversion Tool

- Eliminate the drawbacks of legacy scheduling solutions like Windows Scheduler, Cron Scheduling, and SAP Job Scheduler
- Automatically convert and upgrade native tasks to the UAC
- Optimize resources with event-based scheduling
- Orchestrate workflows across your hybrid IT environment
- Support industry audit standards, including HIPAA, SOX, and GLBA

Easily move your jobs to the Stonebranch UAC — no complex migration planning required.

The Stonebranch Xpress Conversion Tool (XCT) moves natively scheduled tasks to the Universal Automation Center (UAC), then upgrades them into event-based workload automation you can orchestrate alongside the rest of your enterprise-wide automations.

The XCT offers a single point of control for self-service conversions.

Whether you need more process control, faster batch processing, improved auditability, or all of the above, the UAC has you covered.

Stonebranch Universal Controller

Feature		Description
VISIBILITY	☑	Single view of your entire business process
MONITORING	☑	Dashboard shows all relevant data and reports
CENTRAL SCRIPT LIBARY	☑	Central library for all scripts
EVENT MANAGEMENT	☑	Event-based scheduling using real-time resources status info
WEB INTERFACE	☑	Define processes via drag and drop
CALENDAR	☑	Control of run-times via calendar
AUDITING	☑	Supports all major audit standards: SOX, GLBA, HIPAA
FILE TRANSFER	☑	Central definition of all transfers

Legacy Schedulers

Description		Feature
No cross-server dependencies	☒	VISIBILITY
No central control of the process	☒	MONITORING
Scripts are distributed over multiple servers	☒	CENTRAL SCRIPT LIBARY
No event-based scheduling	☒	EVENT MANAGEMENT
Outdated fat client	☒	WEB INTERFACE
No support for calendar, vacations, business days	☒	CALENDAR
No audit capabilities, who did what and when	☒	AUDITING
No file transfer solution	☒	FILE TRANSFER

Convert to UAC — Simply, Independently, and Automatically

With the XCT, automation and efficiency are only four short steps away:

- **Find** and collect task definitions from all servers via XCT.
- **Read** all existing definitions via XCT.
- **Convert** all existing definitions to the UAC.
- **Load** the UAC files into the Universal Controller.

When your legacy tasks are running in the UAC, you gain the power to truly orchestrate workflows across your hybrid IT environment.

1. Auditability

UAC automatically tracks any configuration changes and lets you create fully customizable audit trail reports of your automation landscape. It supports the industry audit standards, including HIPAA, SOX, and GLBA.

2. The Easy Route to Web-Based Enterprise Orchestration

The XCT makes it easy to move from your current scheduler to the UAC's easy-to-use web interface. Once your jobs are in the UAC, you can:

- Connect tasks in workflow sequences to schedule and monitor processes.
- Implement conditional processing based on completion status.
- Easily integrate countless applications with secure APIs.

3. Decreased Batch Processing Time

UAC optimizes the use of computing resources by supporting event-based scheduling in combination with real-time resource control.

XCT makes it easy to move to the UAC.

Stonebranch Simplifies Real-time Automation

Stonebranch builds IT orchestration and automation solutions that help enterprises break down automation silos while gaining centralizing control of automated jobs, tasks, and workloads.

The Universal Automation Center platform supports your entire hybrid IT environment, including on-premises, cloud, and containerized microservices. The platform runs automation in real-time, responds intelligently to business needs, and integrates with just about any application or platform you can throw at it.
