## MISSION MATTERS: U.S. ARMY AWARDS 9-YEAR, \$12.1B ITES-3S UNRESTRICTED CONTRACT TO VETERAN-OWNED TECHNATOMY CORPORATION

Fairfax, VA— The U.S. Army Computer Hardware, Enterprise Software and Solutions (CHES), in coordination with the Army Contracting Command, Rock Island (ACC-RI), has awarded Technatomy Corporation the Information Technology Enterprise Solutions 3 Services (ITES-3S) indefinite-delivery, indefinite-quantity (IDIQ) contract to support information technology services requirements worldwide. Including option periods, the \$12.1 billion contract is expected to be the Army’s primary IT-related services vehicle and may be utilized by the DoD and other Federal agencies for up to nine years.

*“Our team is privileged to have received this much-anticipated Army vehicle award,” stated Technatomy CEO and retired Army Ranger Nadeem Butler. “ITES-3S allows us to extend our next-generation digital process automation and artificial intelligence-enabled solutions and related services directly to the Department of Army with the exceptional benefit of nearly frictionless acquisition processes.”*

The CHES mission is to be the primary source to support the Warfighter's information dominance objectives by developing, implementing, and managing commercial IT contracts that provide enterprise-wide net-centric hardware, software, and engineering and support services for the Army. ITES-3S IDIQ sources a broad range of enterprise-level support services including cybersecurity, integration, consolidation, telecommunications, supply chain management, operation and maintenance, business process engineering, and education and training.

Technatomy Corporation is a veteran-owned, mid-market system integrator specializing in digital process transformation, logistics, financial and human capital initiatives for agencies across the U.S. federal government.
