

logisticsBI™ by IntrafaciX™, the Research and Development Division of Technatomy® Corporation, provides a quick bird's eye view of business performance and more.

Description:

logisticsBI™ is a prototype to illustrate possible Business Intelligence capabilities and is just the “tip of the iceberg” of what IntrafaciX™ can do to address the needs of DoD, Federal, and commercial enterprises. Features include Login Screen, Daily Stoplights, Metrics Charts Dashboard, Product Summary Report, Top 10 Backorder Drivers screen, News, as well as a Feedback page. We pride ourselves in taking a “crowdsourcing” approach to creating apps and we stress communication throughout the entire development process while ensuring customer is not overburdened by info requests.

Potential Application:

Defense Logistics, Army Material Logistics, Naval Supply Systems, Defense Medical Logistics, Air Force Materiel, Emergency Management, Real-time Supply Supportability, etc.

Key Features:

Usability

- Optimized for one-handed usage and phones
- Portrait mode
- User alerts for out-of-tolerance metrics

Navigation

- Bottom navigation bar for one-handed usage
- Top left drop-down menu
- Swipe navigation

Login Screen

- Username and Password Validation
- Ability to add 2-Factor authentication used in customer's environment

Charting

- Sample Combined Chart with Bar and Line Series as well as dual vertical axis
- Other possible charts are:
 1. Line Chart
 2. Bar Chart
 3. Horizontal Bar Chart
 4. Pie Chart
 5. Pie Chart with Value Lines
 6. Scatter Chart
 7. Bubble Chart
 8. Stacked Bar Chart
 9. Candle Stick Chart
 10. Radar Chart
- ... many more

Feedback

- Screen allows customers to provide feedback on the features shown in prototype app
- Desired features can also be submitted thereby allowing “crowdsourcing” of wanted features
